White, 2002 This highly selective bibliography supplements the original bibliography developed in 1978 by Ms Betsy C Kysely to support the Eighth Military History Symposium While this bibliography focuses primarily on materials published since the earlier bibliography was developed it does include some significant materials that were published prior to 1978 but that were omitted from that edition Emphasis in this supplement is on scholarly analysis of air power itself and scholarly depictions of its history Like most editions of the United State Air Force Academy Directorate of Libraries publication Special Bibliography Series this compilation is limited to current holdings of the Academic Library at the Academy It includes books reports government documents and journal articles Excluded are pictorial works newspaper articles works of fiction studies of the technology of aircraft and associated weaponry and items focused on the general history of aviation Readers wanting information on the history of aviation certainly prior to the Wright Brothers are encouraged to consult the U S Air Force Academy Friends of the Library publication *The Genesis of Flight The Aeronautical History Collection* of Colonel Richard Gimbel **One Hundred Years of Air Power and Aviation** Robin Higham, 2003 In this precise interpretive and informative volume Higham looks at everything from the roots of strategic bombing and tactical air power to the lessons learned and unlearned during the invasion of Ethiopia the war in China and the Spanish Civil War He also considers the problems posed by jet aircraft in Korea and the use of Patriot missiles in the Persian Gulf He covers anti guerrilla operations doctrine industrial activities and equipment as well as the development of commercial airlines *The Influence of Foreign Wars on U.S. Domestic Military Policy* Robert W. Tomlinson, 2024-04-08 How do military organizations learn This book covers an important instance of military learning in which the United States military systematically examined the lessons of Israel s decisive victory in the 1973 Yom Kippur War and applied those lessons towards major doctrinal and equipment changes The book relies heavily on Paul Senge s model of learning organizations outlined in his seminal work *The Fifth Dimension* Using Senge s model the book examines the Departments of the Army Air Force and Navy s reactions to the Yom Kippur War and how they organizationally incorporated or ignored the lessons of the conflict within their force Using source documents including personal memoirs doctrinal publications and individual reflections the book offers a vital examination of how militaries can use foreign conflicts to make substantive and necessary organizational changes The Yom Kippur War particularly the Israeli experience in that conflict provided the American military a battle laboratory in which to develop new warfighting concepts and assess new weapons acquisitions In its conclusion the book offers a cautionary tale that suggests learning and change do not come automatically to military organizations If they are to be successful in the future military organizations must embrace learning structures

Wise, Jr., Scott Baron, 2016-04-14 Only the best officers are given command of U S Navy ships and only the elite of these are selected for aircraft carriers The USS America was the third of four Kitty Hawk class super carriers Commissioned in 1965 decommissioned in 1996 she served three times in Vietnam and once each in Libya the Persian Gulf and Bosnia This book profiles the 23 men who commanded the America and her crew of 5 000 during 31 years Most of them were combat veterans World War II Korea Vietnam Mayaguez Rescue Operations Lebanon Haiti Libya Bosnia and Desert Storm Four were Naval Academy graduates seven were test pilots one became Inspector General of the Navy one wore both Navy wings and submariner dolphins and one was a prisoner of war in Vietnam for nearly six years Two retired as admirals one was Chief of Naval Operations five as vice admirals and 11 as rear admirals Each profile gives a career account based on official biographies published memoirs and interviews with the commanders or their families **Black Aces High** Robert K. Wilcox, 2007-04-01 Black Aces High is the riveting account of a modern fighter squadron at war and the exploits triumphs and traumas of its pilots The Black Aces their courage ferocity and instincts made them legendary in military aviation Flying F 14 Tomcats they played as much a part in recent US operations in Kosovo as did any air squadron in the theater air force or navy and probably more Because of its superior performance sophisticated equipment and the two man crews who took it upon themselves to do something extra the Tomcat and its aviators distinguished themselves over and over Forced to locate Serb fighters operating covertly in a mountainous land much like Afghanistan with almost no help from ground spotters VF 14 pilots and backseaters spearheaded new methods for the navy to pinpoint identify and destroy enemy troops and weapons These were tasks that fighter crews had seldom had to do before The Aces had to break rules and frequently go in harms way in order to be successful And they performed so well that for the first time in aviation history a fighter squadron theirs was awarded The Wade McClusky Trophy the navy s premier bombing honor The award named for a World War II dive bomber pilot and post WorldWar II admiral had been won previously only by bombing squadrons Robert Wilcox spent two weeks with The Black Aces aboard the aircraft carrier USS Roosevelt and here provides a long awaited never before seen glimpse into the world of a modern navy fighter squadron Wilcox takes readers into the cockpits as the pilots go out and attack targets while avoiding anti aircraft weaponry He takes us into the war room as they plan their strikes and into their cabins as they contemplate the danger they are facing And the reader can t help but worry for these men as they head off into battle can t help sitting on the edge of the seat as they try to land at night in a rainstorm with waves crashing against the ship and can t help ducking with them as they dodge missile attacks And in the end it is impossible not to feel for these aviators as they question their own courage or to cheer for them when they finally return safely Black Aces High is a story of fear and courage mishap and success fighting spirit and military innovation It s a human story that goes behind the smiling sunglass wearing facade of aviators flashing a V the sterile slow motion target

video that has become a staple of Pentagon briefings and the rock n roll cowboy image of fighter crews seen in the movies. Instead it is a story that shows who these aviators really are and what they do beyond what we know a story which probably will be repeated again and again as our carriers continue to be deployed in the new 21 century war our nation is fighting.

Why Don't Jumbo Jets Flap Their Wings? David Alexander, 2009-06-02. What do a bumble bee and a 747 jet have in common? It's not a trick question. The fact is they have quite a lot in common. They both have wings. They both fly. And they're both ideally suited to it. They just do it differently. *Why Don't Jumbo Jets Flap Their Wings* offers a fascinating explanation of how nature and human engineers each arrived at powered flight. What emerges is a highly readable account of two very different approaches to solving the same fundamental problems of moving through the air including lift, thrust, turning and landing. The book traces the slow and deliberate evolutionary process of animal flight in birds, bats and insects over millions of years and compares it to the directed efforts of human beings to create the aircraft over the course of a single century. Among the many questions the book answers: Why are wings necessary for flight? How do different wings fly differently? When did flight evolve in animals? What vision, knowledge and technology was needed before humans could learn to fly? Why are animals and aircrafts perfectly suited to the kind of flying they do? David E. Alexander first describes the basic properties of wings before launching into the diverse challenges of flight and the concepts of flight aerodynamics and control to present an integrated view that shows both why birds have historically had little influence on aeronautical engineering and exciting new areas of technology where engineers are successfully borrowing ideas from animals. Supplement to Vietnam 1964-1973, 2005. Tiger Check Steven A. Fino, 2017-11. The fielding of automated flight controls and weapons systems in fighter aircraft from 1950 to 1980 challenged the significance ascribed to several of the pilot's historical skillsets such as superb hand-eye coordination required for aggressive stick and rudder maneuvering and perfect eyesight and crack marksmanship required for long range visual detection and destruction of the enemy. Highly automated systems would, proponents argued, simplify the pilot's tasks while increasing his lethality in the air, thereby opening fighter aviation to broader segments of the population. However, these new systems often required new, unique skills which the pilots struggled to identify and develop. Moreover, the challenges that accompanied these technologies were not restricted to individual fighter cockpits but rather extended across the pilot's tactical formations, altering the social norms that had governed the fighter pilot profession since its establishment. In the end, the skills that made a fighter pilot great in 1980 bore little resemblance to those of even thirty years prior despite the precepts embedded within the myth of the fighter pilot. As such, this history illuminates the rich interaction between human and machine that often accompanies automation in the workplace. It is broadly applicable to other enterprises confronting increased automation from remotely piloted aviation to Google cars. It should appeal to those interested in the history of technology and automation as well as the general population of military aviation enthusiasts.
