Ed,2004 **Perplexities of Consciousness** Eric Schwitzgebel,2011-01-28 A philosopher argues that we know little about our own inner lives Do you dream in color If you answer Yes how can you be sure Before you recount your vivid memory of a dream featuring all the colors of the rainbow consider that in the 1950s researchers found that most people reported dreaming in black and white In the 1960s when most movies were in color and more people had color television sets the vast majority of reported dreams contained color The most likely explanation for this according to the philosopher Eric

Schwitzgebel is not that exposure to black and white media made people misremember their dreams It is that we simply don't know whether or not we dream in color In *Perplexities of Consciousness* Schwitzgebel examines various aspects of inner life dreams mental imagery emotions and other subjective phenomena and argues that we know very little about our stream of conscious experience Drawing broadly from historical and recent philosophy and psychology to examine such topics as visual perspective and the unreliability of introspection Schwitzgebel finds us singularly inept in our judgments about conscious experience **North-American Review and Miscellaneous Journal** ,1891 **Journal of the Cherokee Strip** ,1959
