**Population and Food in the Early Twenty-first Century**

Nurul Islam,1995-01-01 The IFPRI roundtable with its focus on the prospects of a long term balance between food demand and supply provided a link between the two conferences as the adequacy of food supply at affordable prices for future populations is a crucial element in a strategy designed to alleviate poverty and accelerate growth in the context of an increasing population **Journal of Economic Literature** ,1991 **Development and Diffusionism** J. Dibia,2015-12-04 This book deconstructs the neopatrimonial paradigm that has dominated analysis of Nigerian and African development It shows that by denying agency to Nigerian societies and devaluing indigenous culture and local realities Eurocentric diffusionism played a significant role in the failure of development planning **The Oxford Handbook of Africa and Economics** Célestin Monga,Justin Yifu Lin,2015 A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments While intellectually charming and often elegantly formulated that conventional wisdom is actually contradicted by historical evidence and common sense It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure In fact the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological low income countries are by definition those where such ingredients are missing None of today's high income countries started its growth process with the required and complete list of growth ingredients Unless one truly believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism the conventional view must be re examined debated and questioned This volume the second of the Oxford Handbook of Africa and Economics reassesses the economic policies and practices observed across the continent since independence It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book **Contemporary Economic Issues in Developing Countries** John Baffoe-Bonnie,Mohammed Khayum,2003-04-30 Important lessons for policy makers are provided here as contributors evaluate the effectiveness of domestic economic policies and the recommendations of international organizations such as the World Bank regarding the economic development of developing countries Challenges posed by debt problems corruption population dynamics poverty and the absence of adequate human and physical capital are highlighted Contributors cast doubts on the conclusions of the prevailing theories of economic development with patterns of economic change over the course of the 20th century Their findings point out the issue of inadequate social capability as a critical factor in understanding the lack of economic development in many developing countries They suggest that contemporary theorizing tends to pinpoint necessary but

insufficient conditions for the successful implementation of development strategies in these countries      Media and Technology in Emerging African Democracies Cosmas Uchenna Nwokeafor, Kehbuma Langmia, 2010-09-02 Media and Technology in Emerging African Democracies is a standard text that will give students an opportunity to familiarize themselves with some of the best literature in media technology impact in emerging African democracies with relevant concentration on information and communication technology ICT This textbook is a collection of essays that may be used as primary reading for courses on mass media technology and information communication technology ICT It is also suitable as supplementary reading in media and politics political science and courses that focus on political communication and business communication The book serves as a reference guide to mass media scholars development communication experts government leaders and diplomats interested in media review most importantly as it pertains to African democratic dispensations The book includes contributions by scholars whose research interests in media and its relevant impact on African democratic system have stirred considerable academic discourse The chapters span several social science disciplines giving students professionals and government agencies an opportunity to see challenges from an interdisciplinary perspective      *Government Reports Announcements & Index* ,1991-03      **Institutional Development** Ronald McGill, 2016-07-27 This book reviews the theoretical perspectives on institutional development ID and third world city management It considers the practice of ID in city management by reviewing two related cases on organizational strengthening and building a planning capability both in local government The synthesizing chapters offer some guidelines on and tests for ID in city management practice The book therefore seeks to identify some general principles to guide the ID process in relation to third world city management      **Subject Guide to Books in Print** ,1997
