Ghost Patrol John Sadler, 2015-11-19 From the author of *D Day* an amazing tale of how the world's very first special force was created specifically for North Africa during WWII Books Monthly The origins of most of the West's Special Forces can be traced back to the Long Range Desert Group which operated across the limitless expanses of the Libyan Desert an area the size of India during the whole of the Desert War from 1940 to 1943 After the defeat of the Axis in North Africa they adapted to serve in the Mediterranean the Greek islands Albania Yugoslavia and Greece In the process they became the stuff of legend The brainchild of Ralph Bagnold a prewar desert explorer featured in fictional terms in *The English Patient* the LRDG used specially adapted vehicles and recruited only men of the right temperament and high levels of fitness and endurance Their work was often dangerous always taxing exhausting and uncomfortable They were a new breed of soldier and the Axis never managed to field a similar unit Once the desert war was won they transferred their skills to the Mediterranean sector retraining as mountain guerrillas serving in the ill fated Dodecanese campaign then in strife torn Albania Yugoslavia and Greece fighting alongside the mercurial partisans In addition the LRDG worked alongside the fledgling SAS and established beyond all doubt the value of highly trained Special Forces a legacy which resonates today Genuinely gripping a tale of eccentrics and their high adventures during very dangerous times Classic Military Vehicle **Providence Their Guide** David L. The Long Range Desert Group in the Aegean Brendan O'Carroll, 2020-09-30 A history of the British Army unit's deployment to and defense of a group of islands between Greece and Turkey during World War II Shortly after the invasion of Sicily in order to distract German attention from the Italian campaign Churchill ordered the occupation of the Dodecanese Islands in the Aegean The Long Range Desert Group retraining in Lebanon were now part of Raiding Forces Middle East along with the Special Boat Service and No 30 Commando In support of 3 000 regulars in 234 Brigade the LRDG landed covertly on Leros establishing observation posts reporting movement of enemy shipping and aircraft In October the LRDG were ordered to assault the island of Levitha losing forty highly skilled men killed or captured The Germans invaded Leros with overwhelming force on 12 November 1943 five days later the battle was over While many British troops were captured most of the LRDG and SBS escaped Their individual stories make for enthralling reading A measure of the intensity of the fighting is the fact that the LRDG lost more men in three months in the Aegean than in three years in the desert operating behind enemy lines The author an acknowledged expert on the LRDG uses official sources both British and German and individual accounts to piece together the full story of this dramatic costly but little known campaign It is a valuable addition to the history of special forces in the Second World War Praise for The Long Range Desert Group in the Aegean O Carroll provides an interesting and informative read about a little known action by a World War II era special operations unit and an important part of SOF history SOF News

Special Operations in World War II Andrew L. Hargreaves, 2013-10-28 British and American commanders first used modern special forces in support of conventional military operations during World War II Since then although special ops have featured prominently in popular culture and media coverage of wars the academic study of irregular warfare has remained as elusive as the practitioners of special operations themselves This book is the first comprehensive study of the development application and value of Anglo American commando and special forces units during the Second World War Special forces are intensively trained specially selected military units performing unconventional and often high risk missions In this book Andrew L Hargreaves not only describes tactics and operations but also outlines the distinctions between commandos and special forces traces their evolution during the war explains how the Anglo American alliance functioned in the creation and use of these units looks at their command and control arrangements evaluates their impact and assesses their cost effectiveness The first real impetus for the creation of British specialist formations came in the desperate summer of 1940 when having been pushed out of Europe following defeat in France and the Low Countries Britain began to turn to irregular forces in an effort to wrest back the strategic initiative from the enemy The development of special forces by the United States was also a direct consequence of defeat After Pearl Harbor Hargreaves shows the Americans found themselves in much the same position as Britain had been in 1940 shocked outnumbered and conventionally defeated they were unable to come to grips with the enemy on a large scale By the end of the war a variety of these units had overcome a multitude of evolutionary hurdles and made valuable contributions to practically every theater of operation In describing how Britain and the United States worked independently and cooperatively to invent and put into practice a fundamentally new way of waging war this book demonstrates the two nations flexibility adaptability and ability to innovate during World War II

The Eyes of the Desert Rats David Syrett, 2014-08-19 Made up of members of the Coldstream and Scots Guards British Yeomanry cavalry regiments New Zealanders South Africans and Indian Army men the Long Range Desert Group was perhaps the most effective of all the special forces established by the Allies during the Second World War It was able to go thousands of miles into enemy territory well armed and carrying its own supplies of petrol food and even water to last for weeks at a time something quite new in military history Using experience acquired in WWI and inter war exploration travels the LRDG thus developed the ability to appear almost anywhere in the desert to carry out almost every type of ground reconnaissance mission possible in desert warfare exploring and mapping the terrain transporting agents

behind enemy lines or determining the strength and location of enemy forces with an extraordinary degree of accuracy and detail and thus able to verify or hide Ultra intelligence Equally important were their skills in the art of desert navigation demonstrated in the outflanking of the enemy during the Allied advance from El Alamein westward to Tunisia as led by the LRDG Once it had teamed up with the Special Air Service SAS made up of British Free French Commonwealth and Jewish Palestinian soldiers the LRDG perfected the art of irregular mechanized warfare conducted in the rear of the enemy's forces in the desert attacking enemy installations of all kinds mining roads raiding airfields destroying enemy aircraft on the ground and inflicting losses upon the enemy in inverse proportion to their own remarkably low rate of casualties Through meticulous research in original archival material this book thus tells the extraordinary story of how a relatively small number of dedicated men developed the methods and techniques for crossing by motor vehicle the depths of the then unmapped and seemingly impassable great deserts of Egypt and Libya the Western Desert during the British Army's North African Campaign of 1940-43 The Long Range Desert Group and the Special Air Service as a matter of course did extraordinary things the heroic was the commonplace Their tactics techniques and remarkable success in desert warfare continue to make them of great interest to the student of military affairs Likewise as it seeks to answer how the deep desert can best be used for military purposes this study is pertinent to today's military operations perhaps more so than at any time since World War II this study provides fresh insights into the nature of desert warfare past present and future and reveals the peculiarities of this warfare often lost to modern armies a virtual primer useful to commanders and soldiers alike At long last this book can find its rightful place in the classroom of military courses and colleges and in the hands of those interested in the intricacies complexities and problems of military operations in desert regions From the Foreword to the book by Colonel Retired David M Glantz
