ANA LYDIA SAWAYA

## Health, nutrition and life conditions

NOWADAYS, it's ever clearer that, for a real understanding of the diseases and their consequences, the anthropological aspects, the psychological dynamism and the social diagnosis of the physically frail people must be considered. For example, the physiological evidences that it's necessary to see man as an integrated phenomenon instead of as independent parts among itself, have increased. A reasonable amount of scientific papers offers ever more examples of that integrality, such as the studies on the effects of happiness on the person's health by the end of his or her life. A study carried out in the United States, for example, concluded that, within a sample of catholic nuns, writings with a positive emotional content at 22 years old were associated with health and longevity at 60 years old (Danner et al., 2001).

Therefore, as far as physiology is concerned, what goes on with a person who considers him or herself happy? There are strong relationships between that kind of statement, life expectancy and the frequency and intensity of chronic diseases, such as cardiovascular, inflammatory and self-immune ones (Steptoe et al., 2005). Such studies identified an inversely correlate biological marker to that happiness declaration: cortisol, the stress hormone. The higher its levels in the saliva when the person wakes up, the greater the stress level and the worse is the life quality in the long-term. It has become increasingly difficult to separate the human being into pieces... The life quality of the human being depends on what he feels and on the meaning he gives to things, and both are associated to his physiological status.

Those same mechanisms are activated when the person receives insufficient feeding in quantitative terms, or inadequate feeding in qualitative terms (when there's a lack of necessary nutrients, such as vitamins and minerals), mainly early in life. The organ that controls all our metabolic activity, the nervous system, permanently "programs" itself to save energy in the form of fat and to reduce growth, in order to guarantee survival in adverse

Governing for the Long Term Alan M. Jacobs, 2011-03-28 In *Governing for the Long Term* Alan M Jacobs investigates the conditions under which elected governments invest in long term social benefits at short term social cost Jacobs contends that along the path to adoption investment oriented policies must surmount three distinct hurdles to future oriented state action a problem of electoral risk rooted in the scarcity of voter attention a problem of prediction deriving from the complexity of long term policy effects and a problem of institutional capacity arising from interest groups preferences for distributive gains over intertemporal bargains Testing this argument through a four country historical analysis of pension policymaking the book illuminates crucial differences between the causal logics of distributive and intertemporal politics and makes a case for

bringing trade offs over time to the center of the study of policymaking

*European Integration and Supranational Governance* Wayne

Sandholtz,Alec Stone Sweet,1998-09-24 The European Union began in 1957 as a treaty among six nations but today constitutes a supranational polity one that creates rules that are binding on its 15 member countries and their citizens This majesterial study confronts some of the most enduring questions posed by the remarkable evolution of the EU Why does policy making sometimes migrate from the member states to the European Union And why has integration proceeded more rapidly in some policy domains than in others A distinguished team of scholars lead by Wayne Sandholtz and Alec Stone Sweet offers a fresh theory and clear propositions on the development of the EU Combining broad data and probing case studies the volume finds solid support for these propositions in a variety of policy domains The coherent theoretical approach and extensive empirical analyses together constitute a significant challenge to approaches that see the EU as a straightforward product of member state interests power and bargaining This volume clearly demonstrates that a nascent transnational society and supranational institutions have played decisive roles in constructing the European Union

**USH 45 (New London Bypass), Outagamie County, Wisconsin** ,1990 Strategic Management and Myopia

Wojciech Czakon,2022-04-28 This book investigates the phenomenon of strategic myopia which refers to important cognitive distortions that managers systematically display It captures narrow views and preferences which are likely to hurt firms long term prospects Instead of accusing managers of imperfections opportunism or blindness this book explains how strategic myopia stems from individual dispositions how it is shaped by team contingencies and encouraged by organizations design The reader will learn how a metaphor introduced to explain business failure evolved over decades to become a concept useful in understanding intertemporal choices technology substitution competitive advantage erosion competitive blindspots and missed opportunities In addition to explaining the mechanisms that encourage myopic behaviors readers are offered a set of effective ways to address strategic myopia A key benefit of this work is that the structure of the book allows the use of chapters separately The core message is that eliminating strategic myopia is hardly possible and may actually hurt the firms short term efficiency However organizations may develop capabilities and implement designs that favor balancing the short term benefits of myopia and alleviate its long term drawbacks This book will be of interest to scholars researchers advanced students and experienced managers in the fields of strategic management and organizational behavior
