Longterm Scenario Study Of The World Economy 19902015:

A Long-term Scenario Study of the World Economy, 1990-2015 Netherlands. Centraal Planbureau, 1992 Presents four scenarios based on the comparative strength of economic development in particular countries or country groups

Scenario Studies for the Rural Environment Job F.Th. Schoute, Peter A. Finke, Frank R. Veeneklaas, Henk P. Wolfert, 2012-12-06 Rural areas need to fulfil a large variety of functions and to accommodate many activities The complexity of the problems limited funds and the almost irreversible character of some interventions result in a compelling need to evaluate ex ante the effects of alternative solutions for designation of land for measures to develop infrastructure and for soil and water management Scenario studies are undertaken to help manage the complexity to place bounds on uncertainties and to create new visions After an overview of the nature variety and scope of scenario studies the book illuminates various European examples and reviews under the following headings regional soil and water management nature development and landscape quality rural planning and the future of regions

Long-term Prospects for the World Economy Organisation for Economic Co-operation and Development, 1992 Economy—Energy—Environment Simulation K. Uno, 2005-12-08 In the policy arena as well as in the academic world a new challenge is having to deal with the global community We are increasingly aware that the world is linked through economy energy environment interactions We are increasingly aware at the same time that the emergence of the global community does not imply an integrated harmonious world rather it is a community where co tries regions of different interests and values face each other directly Global governance has to be achieved through actions of national governments under different motives and constraints We need to have an analytical tool that is capable of producing a global picture yet with detailed country resolution If the world is a better place now compared to 100 years ago in terms of p capita income this is due to the industrialization that continued throughout the 20th century We entered the 21st century knowing that the human aspiration that translates into ever increasing production may not be tenable in the long run Sustainability of the global community is at stake In contrast to inc mental decision making through the market mechanism that should lead to some optimal state under some assumptions such as perfect knowledge smooth movement of resources no externalities and so forth we need to have an a lytical tool to provide us with details of the future state of the world

The Future of Global Conflict Volker Bornschier, Christopher Chase-Dunn, 1999-07-06 This critical analysis of long term trends and recent developments in world systems examines such questions as Will the cycles of boom and bust peace and war of the past 500 years continue Or have either long term trends or recent changes so profoundly altered the structure of world systems that these cycles will end or take on a less destructive form The noted international contributors to this volume examine the question of future dominance of the core global systems and include comprehensive discussions of the economic political and military role of the Pacific Rim Japan and the former Soviet Union

European Organised Crime Scenarios for 2015 Tom Vander Beken, 2006 Policy makers no longer focus on repressive aspects of

organised crime alone but want to be informed about coming challenges and threats to allow them to take appropriate preventive action and target their reactive response better For that reason there is a growing demand to change the traditional assessments into analyses that include more prospective elements about current and potential future organised crime situations to identify specific risks or threats to society The book outlines a methodology to perform analyses of long term threats of organised crime and scenario studies and applies this on four case studies at two different levels three studies at Member State level Belgium Slovenia and Sweden and one at the European Union level In a last chapter conclusions and recommendations about the method and its applications are presented The developed methodological tool and the scenarios are intended as a guide for action and consideration for all actors involved in the fight against organised crime

Strzepek,Joel B. Smith,1995-12-07 *As Climate Changes* International Impacts and Implications is the most comprehensive study to date examining potential global effects of climate change The project which was funded by the US Environmental Protection Agency involved over 150 scientists from around the world Common climate change scenarios were used to examine impacts on agriculture water resources coastal resources forests and human health The studies focused on impacts of climate change on developing countries around the world and included an integrated case study of Egypt In addition the agriculture and forests studies also examined global effects The studies found that developing countries may be more vulnerable to climate change because some impacts may be more negative on these countries they have a higher share of national income in climate sensitive sectors and they have fewer resources to adapt to climate change This volume summarises the methods and findings from these studies **Economics and Utopia**

Geoffrey M Hodgson,2002-01-04 Since the fall of the Berlin Wall we have been told that no alternative to Western capitalism is possible or desirable This book challenges this view with two arguments First the above premise ignores the enormous variety within capitalism itself Second there are enormous forces of transformation within contemporary capitalisms associated with moves towards a more knowledge intensive economy These forces challenge the traditional bases of contract and employment and could lead to a quite different socio economic system Without proposing a static blueprint this book explores this possible scenario *The Future of Medicines in Health Care* Steering Committee on Future Health Scenarios,1995-07-31 The future place of medicines in health care is both exciting and uncertain With an aging population an increasing number of chronic sick a growing range of treatment options and a developing European market the one certainty is that medication patterns will change radically over the next 15 years or so How the future might look in terms of quality volume and cost of pharmacotherapy is the subject of this report Four scenarios for the future are set out all of which take account of already visible trends Sobriety in sufficiency envisages rational and restrained consumption patterns Risk of avoidance is dominated by fears of iatrogenic harm and hence minimal drug use The central feature of Technology on demand in contrast is confidence in technological progress Free market unfettered finally is marked by a Europe without frontiers and minimal state intervention The reader is encouraged to reflect without preconceptions on the future of medicines in health care No ready made answers are offered rather a wealth of information and analysis is provided which serves to underpin decision making and policy development not just by central government but also by every institution concerned with the role of medicines in health care
