Miller, Helen Laurence, 2001-03-19 Find what you're looking for with the best Internet resources for academic research in the humanities, sciences, and social sciences. Which academic resource deserves more of your budget: printed books and journals or softly glowing terminals? The answer differs depending on the subject area, the availability and reliability of Internet information in that field, and the comparative value of Internet research and traditional print media. *Academic Research on the Internet: Options for Scholars and Libraries* gives you the information you need to make those choices. This comprehensive book examines the usability of the Internet as a scholarly research and reference tool. Each chapter provides a snapshot of Internet information access and usability in a specific subject area, comparing it to traditional print media. In addition, each chapter includes a selected webliography of key resources, a time-saving tool for librarians on the reference desk. Experts in specific subject areas provide up-to-the-minute assessments of the usefulness of the Internet for research in their fields, including Arts and Architecture, Biology, Engineering, Chemistry, Physics, and Mathematics, Music, Philosophy, English and American Literature, History, Political Science, Business, Education, Anthropology and Sociology, Health Sciences, Public Administration, Law, Environmental Sciences, Reference. *Academic Research on the Internet* is designed to provide the facts you need about the reliability, timeliness, and availability of Internet information. With this information, you can decide on the relative value of print subscriptions, assess the degree to which the Internet alone can satisfy users' information needs, and make intelligent choices about budget allocation. **Resources in Education**, 2001-04 [Research within the Disciplines](#)

Peggy Keeran, Michael Levine-Clark, 2014-04-28 *Research within the Disciplines* is designed to help reference librarians and students studying to become librarians gain that deeper understanding of disciplinary differences that allows them to comfortably solve information needs rather than merely responding to questions and practical knowledge about how to work with researchers in a library setting. The book has three chapters that cover the disciplines at the broadest level: humanities, social sciences, and sciences, plus supplemental chapters that focus on associated disciplines: research in history, business, and engineering; research using government sources; and across disciplines: interdisciplinary and critical information literacy. For the second edition of *Research within the Disciplines*, several chapters have been added that together give a broader and deeper overview of research across all subject areas: research practices of creative and performing artists and of clinical scientists; research in international documents; research strategies for foreign language materials and visual literacy across the disciplines. Major shifts in technology have been accounted for that have changed how we do research and have expanded the range of resources available to researchers in all disciplines. All of the chapters have been rewritten or heavily revised; this is much more a new book than a new edition. **France: Oxford Bibliographies Online Research Guide**, Oxford University Press, 2010-06-01 This ebook is a selective guide designed to help scholars and students of Islamic studies find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear: from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading

international authority on the subject the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated related This ebook is a static version of an article from Oxford Bibliographies Online Renaissance and Reformation a dynamic continuously updated online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study of European history and culture between the 14th and 17th centuries Oxford Bibliographies Online covers most subject disciplines within the social science and humanities for more information visit www.oxfordbibliographies.com
