Viewing Art with Babies Kathy Danko-McGhee, 2023-06-06 Viewing Art with Babies demonstrates how to facilitate quality art viewing experiences with babies from as young as 2 months old Such experiences can help to nurture early literacy and receptive language skills sensory stimulation and early brain development Based on the author s research with babies in New Zealand Australia Romania England and the U S the book provides the reader with information about early brain vision sensory and language development and the aesthetic preferences of babies Danko McGhee provides details about the type of art that babies like how to display art in the learning environment and how to interact with a baby when viewing art Case studies of international museums national museums and community agencies that have had success with engaging babies in art viewing experiences have been included in the book as a way of demonstrating how theory and research can be successfully put into practice Viewing Art with Babies details practical ways through which museum practitioners early childhood and community educators and parents can provide artviewing experiences in the museum early childhood classroom or even their own home It will be of interest to practitioners and parents around the world and those engaged in the study of museum education *The Museum Effect* Jeffrey K. Smith, 2014-05-29 Museums libraries and cultural institutions provide opportunities for people to understand and celebrate who they are were and might be These institutions

educate the public and civilize society in a variety of ways ranging from community events to a single child making a first visit The Museum Effect documents this phenomenon explains how it happens and shows how institutions can facilitate this process Cultural institutions vary dramatically in size nature and purpose but they all allow visitors to hold conversations with artists and authors perhaps long dead These conversations sometimes with others present and sometimes with artists scientists explorers or authors not present allow visitors to explore their lives and their possible selves Cultural institutions inspire personal reflection and help visitors better themselves in that they leave having contemplated what is noble excellent or exemplary about the society in which they live The museum effect is a process through which cultural institutions educate and civilize us as individuals and as societies These institutions allow visitors to spend some time with their thoughts elevated and leave the institution better people in some meaningful fashion than when they entered This visionary book presents the underlying idea and the argument for the museum effect along with empirical research supporting that argument It will help those working in museums libraries and archivists to facilitate this process and study how this is working in their own institutions

Paintings and Sculptures: Where Do We Look First? Magali Seille,Zoi Kapoula,2023-05-16 The book presents three studies in which eye tracking data were collected at the Mus e des Beaux Arts in Rouen in June and July 2013 Overall the results of those three studies highlight the knowledge gained from the analysis of the very first saccade in a museum context when people look at paintings and statues The first study analyzes how viewers orient their first saccade on paintings This study shows that in a museum the first saccade is attracted toward the center of paintings This attraction toward the paintings center is found in all the subjects groups that we have studied Noteworthy this effect is significantly less pronounced in individuals who never visit museums It is among amateurs who often visit museums that the center attracts the most the first saccade Among experts painters or art history teachers and to a lesser extent among amateurs the pictorial composition largely determines the orientation of the first saccade We indeed found that as soon as the first saccade experts orient their gaze toward the main subject This phenomenon seems to be explained by the fact that experts immediately orient their gaze here measured as the first saccade toward the paintings location conveying the most meaning It can either be the center or a peripheral area depending on whether the paintings most meaningful subject is located centrally or peripherally The second study shows that the center does not attract the first saccade in 5 year old children This behavior appears later in 8 to 10 year old children However noticeably the 8 10 year old children orient significantly less frequently their first saccade toward the paintings center as adults do and this is also true when one considers non expert adult viewers The results of the third study focus on statues and reveal a very different oculomotor behavior Indeed rather than looking at the center statues viewers exhibit a clear tendency to saccade first at the statues contours This stands in contrast with the behavior that we observe with paintings Our study concludes that statues trigger a specific oculomotor behavior The latter appears to be mostly driven by the physical presence that stone bodies incarnate The

movement and the climax of this movement that sculptors manage to convey thus turn out to attract the gaze in a unique fashion The book concludes that the first saccade is a powerful indicator of the oculomotor behavior that greatly improves our comprehension of the unique relationship between a viewer and artworks

Contemporary Practice in Studio Art Therapy Christopher Brown, Helen Omand, 2022-03-30 Contemporary Practice in Studio Art Therapy discovers where studio practice stands in the profession today and reflects on how changing social political and economic contexts have influenced its ethos and development This is the first UK volume devoted to studio art therapy and the writers explore what is meant by a studio approach and how they are adapting art based practices in radical new ways and settings It comprises three parts Part I Frames of reference explores how particular social cultural and political contexts have led to the discourses within practice Part II Models of practice gives accounts of current studio art therapy practice describing rationale for working methods and providing a resource for practitioners Part III Curating exhibiting and archiving considers how the display and disposal of artworks particularly relevant to studio approaches may be thought about and implemented The book includes chapters from North American authors who illustrate a trajectory of practice that has the potential to point to future developments The book will be essential reading for practitioners and students who are interested in taking a fresh perspective on art therapy and will be encouraged by new ways of thinking about the studio approach in today's changing world

The Victorian Painting of Modern Life Pamela Fletcher, 2024-12-30 This text offers a comprehensive and tightly focused account of the emergence and flourishing of British modern life paintings at midcentury. Contemporary subjects were new and risky in the late 1840s and early 1850s, immensely popular and much debated by 1858 and already falling out of fashion by the mid 1860s. The book follows this story chronologically, moving from the anxious attempts by young artists such as William Powell Frith and William Holman Hunt to capture modern life in a visual language that conveyed both the literal and emotional truths of contemporary experience through the new genre's explosion into popularity in the later 1850s and early 1860s and the critical debates and changing fashions that led to its diminishment by the end of that decade. The book will be of interest to scholars working in art history, British studies, visual culture, exhibition culture, museum studies and the sociology of art.

Environment, Art, and Museums: The Aesthetic Experience in Different Contexts Stefano Mastandrea, Jeffrey K. Smith, Pablo P. L. Tinio, 2021-06-17

Anthropology, by Comparison Richard G. Fox, Andre Gingrich, 2002-09-26 Comparison has long been the backbone of the discipline of anthropology. But recent developments in anthropology, including critical self-reflection and new case studies sited in a globalized world, have pushed comparative work aside. For the most part, comparison as theory and method has been a casualty of the critique of grand theory and of a growing mistrust of objectivist hard science methodology in the social sciences. Today it is time for anthropology to resume its central task of exploring humankind through comparison, using its newfound critical self-awareness under changing global conditions. In *Anthropology By Comparison*, an international group of prominent anthropologists re-visits, re-theorizes, and re-invigorates comparison as a legitimate and fruitful enterprise. The authors explore the value of anthropological comparison and encourage an international dialogue about comparative research. While rejecting older universalist comparative methods, these scholars take a fresh look at various subaltern and neglected approaches to comparison from their own national traditions. They then present new approaches that are especially relevant to the globalized world of the twenty-first century. Every student and practitioner of anthropology and the social sciences will find this thought-provoking volume essential reading. *Anthropology by Comparison* is a call to creative reflection on the past and productive action in the present, a challenge to anthropologists to revitalize their unique contribution to human understanding. *Anthropology by Comparison* is an indispensable overview of anthropology's roots and its future with regard to the comparative study of humankind.

A Place to Know Margaretha Rossholm Lagerlöf, 2018-06-14 To engage with the aesthetic is to watch yourself watching and what you see cannot be reached for; all that exists is the reflection of the vision performed by you. The aesthetic experience offers insights into the consciousness that are both ancient and linked to creative inventions in present-day art culture. In *A Place to Know*, Margaretha Rossholm Lagerlöf interprets twelve recent artworks from Sol LeWitt to Katharina Grosse. She sets out the unique claims and qualities which are inherent in seeing and understanding contemporary art. The book presents four

analytical categories of artwork charting the character of the aesthetic experience and the traditions that determine how we think about visual art She peels back the layers of consciousness to lay bare the forgotten seams of experience interwoven with artistic expression The ancient thus arcs into a deepened awareness of avant garde art
