Broadly speaking transhumanism refers to a philosophy whose focus is to move beyond current human limits This book suggests an approach to transhumanism based on a perception of Light elaborated in the previous nine books in the Cosmology of Light book series In this perception light is envisioned as existing at different constant speeds We know that in our physical universe light travels at a constant speed referred to as c of 186 000 miles per second This has a concrete bearing on how we experience time and space and on how matter arises and in a Cosmology of Light it can be said that light at c is an intentionality to filter infinite potentiality from Light s native state of traveling infinitely fast so life can arise in a particular way So imagine light traveling infinitely fast This would suggest another reality packed with infinite possibility due to Light s omnipresence omnipotence omniscience and omninurturing fourfoldness Omnipresence because Light would be instantaneously present in whatever volume considered Omnipotence because anything not of the nature of light will be overcome by it Omniscience because light being everywhere will know what arises or disappears in it Omninurturing because all would exist in one nature and be bound by it As the previous books have elaborated and as this book will adequately summarize a cosmology arises when we consider the simultaneous and interpenetrating realities created when Light exists at multiple constant speeds simultaneously The dynamics and information resident in each of these simultaneous realities is arbitrated into material reality through a constant and persistent quantum level computation that generates genetic type information that effectively becomes law Quanta in such a cosmology is perceived as being the mechanism by which information in faster moving layers of light is materialized in a slower moving layer of light Law manifests as quadrumvirate mechanisms such as space time energy gravity the electro magnetic wave archetype mass potential spectrum quark lepton boson Higgs boson particles s shell p shell d shell f shell atoms nucleic acid lipid protein polysaccharide cells amongst other mechanisms that derive their ability to become based on the native being of Light s omnipresent omnipotent omniscient omninurturing fourfoldness It may even be said that such becomings resulting in quadrumvirate based law reveal essential beings Hence a being or a particular kind of taxonomic classification akin to the species genus family order class phylum kingdom domain as in the hierarchy of life is revealed with successful becoming Plate 1 that follows shortly summarizes such a classification by way of a contemplative map of being Hence Light in its native state traveling with infinite speed may be thought of as sitting at the top of such a taxonomic hierarchy generating light based domains kingdoms phyla classes and so on But such fourfoldness that manifests as effective law or through the becoming involving persistent quantum level computation that reveals a being is none other than a triumph of love For it is only the power of love of that innate need to

maintain the integrality of light's fourfoldness even as it continues to materialize that can be the foundation of a sustainable becoming. The more powerful such love so that in any materialization there is integration not only of the fourfoldness of Light's implicit properties but also of an integration of the many layers of light existing at different speeds the more fully will a becoming be founded on completeness of potentiality in light to itself become a being capable of engendering light based life. Hence as will be suggested in this book not only does a particular type of being engender vast variation within that type but further beings can combine with beings which is essentially an act of love to create more comprehensive beings resulting in all the complexity of life. Life itself will be seen to originate in the native state of Light adding function and variation as light precipitates into more and more material reality emerging as a fullness of life. At the base of all possible variation and advancement in being becoming and life is the ability to influence the process of the persistent quantum level computation so that there is a more complete horizontal and vertical integration of Light a more complete light based singularity as it were and therefore of the output of genetic type information and consequently of laws that are active in a being's becoming. This is what is considered to be the basis of a system or framework of transhumanism in a cosmology of light. **Love the World**

David Adam, 2018-07-19 Writing from lived experience as much as knowledge David Adam conveys a delight in the mystery of being that is deeply attractive. Love the World opens by looking at the beginning of the universe then moves on to the earth's atmosphere the miracle of water and things that we often take for granted but are essential for our health and happiness. It focuses on our relationship with the world and encourages us to reflect on what really matters. In our most fragile moments we know that we are of dust and to dust we shall return but in our depths we know there is more. We are not created out of nothing but out of love. The very source of your being is love. This beautifully written book aims to increase our love for the world through reflecting on what we have discovered about it and using this as a basis for further meditation and spiritual enrichment. It opens by looking at the beginning of the universe and the mystery of being then moves on to our world its atmosphere the miracle of water and things we often take for granted but are essential to our health and happiness. Finally it focuses on our relationship to the earth. Each section offers a short introduction based on scientific discovery a meditation and an exercise in awareness and sensitivity. God of Love and God of Reason David R. Mason, 2016-02-18 These homilies lectures and essays vigorously champion the author's conviction that it is reasonable to believe in a God of pure unbounded love and also that the best religion is a reasonable religion. That is the God of Love is the God of Reason and as a seventeenth century Cambridge preacher put it If you would be religious be rational in your religion. Thus these essays challenge both the New Atheists and Fundamentalists who are twins like Tweedledum and Tweedledee. And they aim positively to unpack the meaning and implications of Jesus dictum You shall love the Lord your God with all your heart and with all your soul and with all your mind. This is the greatest and first commandment. And the second is like it You shall love your neighbor as yourself. On these two commandments hang all the law and the prophets. Undivided Love Janet Gear, 2022-05-25 Undivided Love is

a book about faith how it is expressed and what it communicates Janet Gear offers readers a sympathetic way to interpret the belief inspired actions of those around them without assuming homogeneous understandings of God the church and our place in the world Recognizing the pastoral and strategic challenges provoked by conflicting understandings of what the church is for Gear guides leaders in the artistry of handling shadows and strengths coexisting across five streams of lived faith evangelical ecclesial missional ecumenical and spiritual Ultimately Undivided Love empowers congregations to navigate the terrain of theological diversity shared by their community of faith to nurture its various longings and receive its unique gifts and to ultimately address the deeper question What are we called to do

Artificial Love Paul Shephard, 2003-05-09 A vision of architecture that includes sculpture machines and technology and encapsulates the history of the human species According to Paul Shephard architecture is the rearranging of the world for human purposes Sculpture machines and landscapes are all architecture every bit as much as buildings are In his writings Shephard examines old assumptions about architecture and replaces the critical theory of the academic with the active theory of the architect citizen enamored of the world around him Artificial Love weaves together three stories about architecture into one The first about machines as architecture leads to speculations about technology and the human condition and to the assertion that machines are the sculptures of today The second story is about the ways that architecture reflects the tribal and personal desires of those who make it In the West ideas of community multiculturalism and globalization compete furiously leaving architecture to exist as it always has as the past in the present The third story features individual people experiencing their lives in the context of architecture Here Shephard borrows the rhetorical

device of Shakespeare's seven ages of man to propose that each person's life imitates the accumulating history of the human species. Shephard's version of the history of humans is a technological one in which machines become sculpture and sculpture becomes architecture. For Shephard, our machines do not separate us from nature. Rather, our technology is our nature, and we cannot but be in harmony with nature. The change that we have wrought in the world, he says, is a wonderful and powerful thing.

Love Affair Don Tait, 2017-01-09. Several years ago at a gathering of married priests and their wives, it was asked, "How is it you got married?" I began to reply with a long description of the journey leading up to my decision. After a few minutes, my wife, impatient with the slowness of it all, blurted out, "We fell madly in love and got married." End of story. So begins the story of Don Tait and his spiritual journey from his roots in a devout Catholic upbringing to becoming a celibate parish priest and missionary in Latin America to the life-changing decision to marry, ever faithful to the Spirit who leads to life. While the context of his life is unique, the choice to be faithful is universal.
