Summers, 1999-06-10 A self taught scientist determined to bring science out of the laboratory and into the practical arena French Canadian Felix d Herelle 1873 1949 made history in two different fields of biology Not only was he first to demonstrate the use and application

of bacteria for biological control of insect pests he also became a seminal figure in the history of molecular biology This engaging book is the first full biography of d Herelle a complex figure who emulated Louis Pasteur and influenced the course of twentieth century biology yet remained a controversial outsider to the scientific community Drawing on family papers archival sources interviews and d Herelle s published and unpublished writings Dr William C Summers tells the fascinating story of the scientist s life and the work that took him around the globe In 1917 d Herelle published the first paper describing the phenomenon of the bacteriophage and its biological nature A series of more than 110 articles and 6 major books followed in which d Herelle established the foundation for the later work of the Phage Group in molecular biology Yet d Herelle sometimes inspired animosity in others he was drummed out of the Pasteur Institute he held only one brief permanent position in the scientific establishment at Yale University from 1928 to 1933 and he was bewildered by the social nuances of the world of international science His story is more than the biography of a single brilliant scientist it is also a fascinating chapter in the history of biology

Electronic Information Systems in Sci-tech Libraries Cynthia A. Steinke,1990 Learn more about the variety of ways in which libraries extend their resources to users beyond the physical walls of their organization Librarians discuss the concept of the library as more than just a place since its holdings can now appear on the screen of users computers in the same city or in a city hundreds of miles away but rather as a force that electronically links users directly with both local and remote sources of information Six informative chapters examine electronic information systems and document delivery from the local collection to the workplace between system libraries and from non library sources Readers can look firsthand at some of the most sophisticated and widespread systems in the country including four academic libraries that promote electronic services to remote users and two special libraries offering innovative services The authoritative contributing authors also forecast new systems and services
