Macro Life:

Macrolife George Zebrowski, 2014-04-08 Subtitled A Mobile Utopia this pioneering novel about the meaning of space habitats for human history presents spacefaring as no work did in its time and since A utopian novel like no other presenting a dynamic utopian civilization that transcends the failures of our history Epic in scope Macrolife opens in the year 2021 The Bulero family owns one of Earth's richest corporations As the Buleros gather for a reunion at the family mansion an industrial accident plunges the corporation into a crisis which eventually brings the world around them to the brink of disaster Vilified the Buleros flee to a space colony where young Richard Bulero gradually realizes that the only hope for humanity lies in macrolife mobile self-reproducing space habitats A millennium later these mobile communities have left our sunspace and multiplied Conflicts with natural planets arise John Bulero a cloned descendant of the twenty-first century Bulero clan falls in love with a woman from a natural world and experiences the harshness of her way of life He rediscovers his roots when his mobile returns to the solar system and a tense confrontation of three civilizations takes place One hundred billion years later macrolife now as numerous as the stars faces the impending death of nature Regaining his individuality by falling away from a highly evolved macrolife a strangely changed John Bulero struggles to see beyond a collapse of the universe into a giant black hole Inspired by the possibilities of space settlements projections of biology and cosmology and basic human longings Macrolife is a visionary speculation on the long-term future of human and natural history Filled with haunting images and memorable characters this is a vivid and brilliant work

companion for reef divers wishing to identify photograph or learn about the myriad of fascinating creatures who inhabit the world's tropical reefs and mangroves. The definitive and concise descriptions are drawn from the authors' first-hand experiences and are subdivided under the headings of distribution, size, habitat, and life habits. Each of the book's 1200 listings are also accompanied by stunningly clear and detailed photographs further facilitating the identification of species. The main body of the book is also complemented by two full indexes: one cataloguing species common names and another for their Latin titles. In addition, the authors also impart advice on how to use underwater cameras to capture beautiful images such as those presented within. Whilst the guide is primarily focused on the tropics, many species of bony fish, this attention is not at the expense of the reptiles, crustaceans, and cartilaginous fish who also inhabit these fascinating sub-aquatic ecosystems. A detailed introduction also considers reef formation, history, and ecological requirements. Conveniently sized to fit in any travel bag and printed on heavy-weight gloss paper, *A Diver's Guide to Reef Life* is the practical, affordable, and definitive guide that will answer every question the inquisitive diver may choose to ask of it.
