Macroeconomic Conflict Social Institutions:

Macroeconomic Conflict and Social Institutions American Economic Association. Meeting, 1985 The Goals of Macroeconomic Policy Martin Prachowny, 2012-11-12 Politicians win elections by promising Jobs Jobs Jobs but in practice these promises quickly fall by the wayside The Goals of Macroeconomic Policy asks why It begins with the observation that there is no convincing economic argument that full employment should be the primary objective of economic policy in all circumstances In the light of this it examines why policy has failed so consistently It explains this by a theory of the labour market which shows why most workers are happy to operate in a way which militates against full employment It then proceeds to analyse the rather dire consequences of this for the budget deficit Macroeconomics and the Real World: Volume 2: Keynesian Economics, Unemployment, and Policy Roger E. Backhouse, Andrea Salanti, 2000-11-23 Since the middle of twentieth century economists have invested great resources into using statistical evidence to relate macroeconomic theories to the real world and many new econometric techniques have been employed In these two volumes a distinguished group of economic theorists econometricians and economic methodologists examine how evidence has been used and how it should be used to understand the real world Volume 1 focuses on the contribution of econometric techniques to understanding the macroeconomic world It covers the use of evidence to understand the business cycle the operation of monetary policy and economic growth A further section offers assessments of the overall impact of recent econometric techniques such as cointegration and unit roots Volume 2 focuses on the labour market and economic policy with sections covering the IS LM model the labour market new Keynesian macroeconomics and the use of macroeconomics in official documents in both the USA and EU These volumes will be valuable to advanced undergraduates graduate students and practitioners for their clear presentation of opposing perspectives on macroeconomics and how evidence should be used The chapters are complemented by discussion sections revealing the perspectives of other contributors on the methodological issues raised *The Economic Impact of Conflicts and the Refugee Crisis in the Middle East and North Africa* Mr. Bjoern Rother, Ms. Gaelle Pierre, Davide Lombardo, Risto Herrala, Ms. Priscilla Toffano, Mr. Erik Roos, Mr. Allan G Auclair, Ms. Karina Manasseh, 2016-09-16 In recent decades the Middle East and North Africa region MENA has experienced more frequent and severe conflicts than in any other region of the world exacting a devastating human toll The region now faces unprecedented challenges including the emergence of violent non state actors significant destruction and a refugee crisis bigger than any since World War II This paper raises awareness of the economic costs of conflicts on the countries directly involved and on their neighbors It argues that appropriate macroeconomic policies can help mitigate the impact of conflicts in the short term and that fostering higher and more inclusive growth can help address some of the root causes of conflicts over the long term The paper also highlights the crucial role of external partners including the IMF in helping MENA countries tackle these challenges "Conflict-Free" Socio-Economic Systems Elena G. Popkova, 2019-07-04 This book analyses the role of crisis or

conflicts within socio economic systems and advocates the concept of a conflict free system as the landmark of global economic development

Evolutionary Macroeconomics John Foster, 2011 First published in 1987 Evolutionary Macroeconomics offers an evolutionary approach to macroeconomics as an alternative to contemporary new classical and Keynesian macroeconomics In order to develop such an approach an alternative view of the micro foundations of macroeconomics is presented The book begins with a commentary on the state of macroeconomics and an evaluation of attempts to redevelop its underlying vision of economic behaviour Particular attention is paid to the treatment of expectations and anticipations The second part of the book presents a behavioural framework which is compatible with an evolutionary perspective on economic behaviour The third part of the book discusses the implications of adopting an evolutionary approach to macroeconomic theory empirical methods and policy design culminating in a specific policy proposal to cure stagflation

A History of Macroeconomics from Keynes to Lucas and Beyond Michel De Vroey, 2016-01-08 This book retraces the history of macroeconomics from Keynes's General Theory to the present Central to it is the contrast between a Keynesian era and a Lucasian or dynamic stochastic general equilibrium DSGE era each ruled by distinct methodological standards In the Keynesian era the book studies the following theories Keynesian macroeconomics monetarism disequilibrium macro Patinkin Leijonhufvud and Clower non Walrasian equilibrium models and first generation new Keynesian models Three stages are identified in the DSGE era new classical macro Lucas RBC modelling and second generation new Keynesian modeling The book also examines a few selected works aimed at presenting alternatives to Lucasian macro While not eschewing analytical content Michel De Vroey focuses on substantive assessments and the models studied are presented in a pedagogical and vivid yet critical way

Institutional Conflicts and Complementarities Robert Franzese, Peter Mooslechner, Martin Schürz, 2013-03-09 This important collection presents an authoritative selection of papers on Institutional Conflicts and Complementarities This publication is intent on building bridges between economics and the other social sciences The focus is on the interaction between monetary policy and wage bargaining institutions in European Monetary Union EMU Institutional Conflicts and Complementarities is written by acknowledged experts in their field The outcome is a broad analysis of the interactions of labour market actors and central banks The volume addresses the recent changes in EMU An important theoretical empirical and policy relevant conclusion that emerges from Institutional Conflicts and Complementarities is that even perfectly credible monetary conservatism has long term real effects even in equilibrium models with fully rational expectations

The 'Uncertain' Foundations of Post Keynesian Economics Stephen Dunn, 2010-04-05 Pt 1 The uncertain foundations of post Keynesian economics pt 2 The nature of uncertainty pt 3 The future of post Keynesianism

A Pluralistic Introduction to Macroeconomics Hendrik Van den Berg, 2024-03-14 This introductory textbook provides a broad introduction to the field of macroeconomics and the alternative approaches to modeling an economic system It ultimately demonstrates that economic modeling is always a matter of choice and

compromise and no one school of thought can accurately capture the full essence of a real evolving economic system under all circumstances in all places and at all times in history **New Keynesian Economics/post Keynesian Alternatives** Roy Jeffrey Rotheim,1998 New Keynesian Economics has been the most significant development in economics in recent years However many modern thinkers have asked whether it actually builds upon or merely distorts Keynes work This unique volume provides the first full scale critique of the New Keynesian school of thought Within its pages Post Keynesian economists including many from the United States challenge New Keynesianism both on the grounds that it is not Keynesian and does not provide an adequate account of our current economic problems Sure to provoke much new debate and even controversy New Keynesian Economics seeks to reconcile these two seemingly intractable systems Radical and Marxist Theories of Crime Paul B. Stretesky,2017-03-02 The essays selected for this volume show how radical and Marxist criminology has established itself as an influential critique since it emerged in the late 1960s Unlike orthodox criminology which emphasizes individual level explanations of criminal behavior radical and Marxist criminology emphasizes power inequality and structures especially those related to class as key factors in crime law and justice This collection of essays draws attention to the way in which structural forces shape and influence both individual and institutional for example governmental behavior highlights neglected crime corporate governmental state corporate and environmental which causes more extensive damage than the street crimes examined by orthodox criminology and discusses the ways in which law and criminal justice processes reinforce power structures and contribute to class control Economic Aspects of Genocides, Other Mass Atrocities, and Their Prevention Charles H. Anderton,Jurgen Brauer,2016-05-09 Alongside other types of mass atrocities genocide has received extensive scholarly policy and practitioner attention Missing however is the contribution of economists to better understand and prevent such crimes This edited collection by 41 accomplished scholars examines economic aspects of genocides other mass atrocities and their prevention Chapters include numerous case studies e g California s Yana people Australia s Aborigines peoples Stalin s killing of Ukrainians Belarus the Holocaust Rwanda DR Congo Indonesia Pakistan Colombia Mexico s drug wars and the targeting of suspects during the Vietnam war probing literature reviews and completely novel work based on extraordinary country specific datasets Also included are chapters on the demographic gendered and economic class nature of genocide Replete with research and policy relevant findings new insights are derived from behavioral economics law and economics political economy macroeconomic modeling microeconomics development economics industrial organization identity economics and other fields Analytical approaches include constrained optimization theory game theory and sophisticated statistical work in data mining econometrics and forecasting A foremost finding of the book concerns atrocity architects purposeful strategic use of violence often manipulating nonrational proclivities among ordinary people to sway their participation in mass murder Relatively understudied in the literature the book also analyzes the options of victims before during and after mass violence Further the

book shows how well intended prevention efforts can backfire and increase violence how wrong post genocide design can entrench vested interests to reinforce exclusion of vulnerable peoples and how businesses can become complicit in genocide In addition to the necessity of healthy opportunities in employment education and key sectors in prevention work the book shows why new genocide prevention laws and institutions must be based on reformulated incentives that consider insights from law and economics behavioral economics and collective action economics **Discover Sociology: Core Concepts**
