The Logic of Economic Reform in China Xiaojing Zhang, Xin Chang, 2015-11-19 This book provides a historical overview of Chinese economic reform over the past 30 years From the genesis of the reform to the gradual improvement of the market system and then to the re start of the critical stage of the reform this book includes not only research on the reform process but also detailed descriptions of the key areas of reform since the Third Plenary Session of the 18th CPC Central Committee On this basis the author develops six logics for Chinese economic reform Firstly reform is cyclical moving between rapid advances and deadlock this calls upon us to re examine the common view of reform Secondly reform is systematic it cannot succeed without supporting reforms in other fields Thirdly the relationship between reform development and stability should be properly handled This trinity is quite different from the perspective of western mainstream theory which puts too much emphasis on efficiency Fourthly the success of Chinese reform was not achieved by chance The reform practice is based on the theoretical logic and also goes beyond the debate between progressive and radical modes Fifthly the Top level Design should be combined with crossing the river by moving from stone to stone i e the theoretical basis of reform should be combined with reform practice Sixthly and lastly the ongoing reform in China must be understood in the contexts of global competition and reform competition

Economic Lessons from China's Forty Years of Reform and Opening-up David Daokui Li,2021-03-26 This book first shows that the past 40 years of China s economic reform and opening up represents the greatest magnitude of economic growth in history Based on field trips extensive and intensive interviews and literature surveys this book argues that there are five general lessons for a rapid growing economy from China s economic reform and opening up all in the area of the relationship between the government and the economy First the local governments need to be incentivized to help rapid

entry and development of enterprises Second local governments need to be incentivized to help rapid land conversion from agricultural to non agricultural Third financial deepening is vital that is inducing households to hold more and more financial assets in local currency Financial deepening is essential to convert savings into investments This requires financial stability which is crucial Fourth the learning through opening up is the key to endogenous economic growth The fundamental benefit of opening up is learning rather than enjoying comparative advantage The fifth and final lesson from China is that the central government must proactively manage the macroeconomy The rationale is that enterprises compete with each other in games of industrial organization In order to resolve this problem proactive measures including market oriented means administrative orders and reform measures should be implemented Overall the main lesson from China's past 40 years of reform and opening up is that proper incentives and behavior of the government local and central are important for economic growth China has been conducting reforms in this regard and as a result the government more or less has been playing the role of a helping hand regarding economic growth although China's economic system is far from perfect and many reforms are still needed

Dorn, Wang Xi, Cato Institute, 1990-11-29 In this volume distinguished Chinese and Western scholars provide a detailed examination of the problems associated with China's transition to a market oriented system A variety of reform proposals aimed at resolving the contradictions inherent in piecemeal reform are discussed along with the chances for future liberalization These clearly written and insightful essays address the roots of China's crisis The authors focus on institutional changes necessary for a spontaneous market order and point to the close relation between economic reform and political constitutional reform Topics include the speed and degree of the transition whether ownership reform

must precede price reform how inflation can be avoided steps to depoliticize economic life how to create an environment conducive to foreign trade and investment and how to institute basic constitutional change and open China to the outside world The revolutionary changes now shaking the foundations of socialism and central planning in the Soviet Union and Eastern and Central Europe are sure to have an impact on China's future Despite their seriousness the events of Tiananmen Square may constitute only a temporary detour on the road toward a private market order The essays in this volume help lay a rational framework for understanding China's present problems and for discussing the prospects for future reform
