**Regionalization vs. Globalization** Mr. Hideaki Hirata, Mr. Ayhan Kose, Mr. Christopher Otrok, 2013-01-22 Abstract Both global and regional economic linkages have strengthened substantially over the past quarter century We employ a dynamic factor model to analyze the implications of these linkages for the evolution of global and regional business cycles Our model allows us to assess the roles played by the global regional and country specific factors in explaining business cycles in a large sample of countries and regions over the period 1960-2010 We find that since the mid 1980s the importance of regional factors has increased markedly in explaining business cycles especially in regions that experienced a sharp growth in intra regional trade and financial flows By contrast the relative importance of the global factor has declined over the same period In short the recent era of globalization has witnessed the emergence of regional business cycles Asian Perspectives on Financial Sector Reforms and Regulation Masahiro Kawai, Eswar Prasad, 2011-11-02 Examines Asia's emerging markets which survived the financial debacle of 2008-09 with only modest declines in growth discusses activities that could dampen continuing development in these markets including inflation surging capital inflows asset and credit bubbles and rapid currency appreciation and offers strategies to promote financial stability Provided by publisher **Maritime Business and Economics** Okan Duru, 2018-12-07 Asian shipping entrepreneurship relies on strong ties between private entities and public institutions i.e. governments This book examines the growth and sustainability of the Asian maritime world through the lens of the Asian cultural code its social and institutional economics as well as its unique way of public governance The book addresses the economics of maritime industry in a broader stroke to include ship owning shipbuilding port operation and its links and collaborations to other industries from a refreshing perspective The book also examines major maritime nations of Asia in three dimensions history strategy also policy and the current state of the maritime industry The relationship between Asian shipping giants and public institutions is also explored along with the recent developments and challenges of the regional maritime industry in the era of a marine tech boom upsizing tonnage and environmental debates Its comprehensive overview of and unique approach to the subject makes the book a valuable reference to anyone interested in the topic

**Macroeconomic and Monetary Policy Issues in Indonesia** Akhand Akhtar Hossain, 2013-08-15 Following the acquisition of its sovereignty from the Netherlands in 1949 Indonesia experienced serious economic and political problems during the 1950s and 1960s before entering a three decade long period of rapid economic growth Hard hit by the financial crisis of the late 1990s Indonesia undertook a wide range of economic and financial reforms These reforms served to prepare it well for the 2007 08 global financial crisis through which Indonesia passed relatively unscathed Drawing on empirical research this book presents a comprehensive empirical study on the key macroeconomic relations and monetary policy issues in Indonesia The book analyses monetary fiscal and exchange rate policies looking at their interactions and impacts on the economy It demonstrates how important macroeconomic management for monetary and financial stability is to sustained national economic growth and development Data from the 1970s is compared and contrasted with 1950s data to analyse macroeconomic policies and issues in an historical context Statistical and econometric techniques are juxtaposed with general empirical results to supplement informative discussion of macroeconomic and monetary developments This book is a useful contribution to studies on macroeconomics and international development as well as Southeast Asian studies
