**OPEC Bulletin**, 1995 **Business Cycle Economics** Todd A.

Knoop, 2015-02-17 Presents the empirical data of business cycles and the theories that economists have developed to explain and prevent them and considers case studies of recessions and depressions in the United States and internationally. Despite more than two centuries of debate, a definitive explanation of the causes of economic cycles still does not exist. Economists, politicians, and policymakers have argued many well-known theories as to why these peaks and slumps occur, and cyclical recessions and depressions continue in spite of the enormous intellectual reserves working to prevent them. This timely analysis presents a comprehensive overview of global economics, assessing older theories alongside of new ways of thinking to reveal the empirical methods needed to evaluate, forecast, and prevent future crises. Educator and economist Todd Knoop provides explanations of influential macroeconomic theories that have shaped modern economics, such as Keynesian economics, Neoclassical economics, Austrian economics, and New Keynesian economics. In addition, he considers case studies of specific recessions and depressions, beginning with the Great Depression through the East Asian crisis and Great Recession in Japan, and culminating with a detailed examination of the European debt crisis and the 2008 global financial crisis. The work concludes with a look at the insights gained from these fiscal events, as well as the major questions that still remain unanswered as a result of these crises.

Politics and Economics of Removing Subsidies on Petroleum Products in Nigeria Jidefor Adibe, 2013-12-17 Though the history of hikes in petroleum prices began in 1973 when the military government of Gen Yakubu Gowon increased the price of petrol to 9 kobo per litre from the equivalent of 8.8 kobo that had prevailed before, then the politics and economics of removal of subsidies on premium petroleum products entered into the national lexicon in 1986 when the military administration of General Ibrahim Babangida announced that, due to the devaluation of the Naira, the domestic price of fuel had become unsustainable, cheap, and was becoming a burden on the national purse. Ever since, most regimes in the country have toyed with the idea of removing the subsidies, with organised labour and the civil society usually vehemently opposed to the idea. In late 2011, the Jonathan administration announced plans to completely remove the subsidies, but gave no timeline amid threats by organised labour, students, and civil society groups to stoutly resist the move. On January 1, 2012, the regime announced the removal of the subsidies and subsequently reiterated that its decision on the issue was irreversible. It, however, announced some measures, including the provision of buses, to help cushion the impact of the move. This volume takes a critical look at the politics and economics of the pro and anti subsidisation lobbies. It also examines the likely economic and social impacts of the move and its implications for the poor, the overall economy, and the country's democratic project.

**Argument in the Greenhouse** Sujata Gupta, Stephen Hall, Nick Mabey, Clare Smith, 2005-10-05 How can greenhouse gases be controlled and reduced? Will it be in time? This book adds a significant new contribution to the crucial climate change/global warming debate. Incorporating the key political and legal considerations into real-world applied economic analysis, the authors provide a unique focus on the wider political economy of the problem. All the key issues of controlling climate change costs, timing, and degree of stabilisation, ecological tax reform,
