Studies in Occultism Helena Petrovna Blavatsky, 2014-04 Studies in Occultism by H P Blavatsky Practical Occultism Occultism Versus the Occult Arts Occultism is not magic It is comparatively easy to learn the trick of spells and the methods of using the subtler but still material forces of physical nature the powers of the animal soul in man are soon awakened the forces which his love his hate his passion can call into operation are readily developed But this is Black Magic Sorcery For it is the motive and the motive alone which makes any exercise of power become black malignant or white beneficent Magic It is impossible to employ spiritual forces if there is the slightest tinge of selfishness remaining in the operator For unless the intention is entirely unalloyed the spiritual will transform itself into the psychic act on the astral plane and dire results may be produced by it The powers and forces of animal nature can equally be used by the selfish and revengeful as by the unselfish and the all forgiving the powers and forces of spirit lend themselves only to the perfectly pure in heart and this is Divine Magic

Spiritualism, Madame Blavatsky and Theosophy Rudolf Steiner, 2002-11 This work builds on the foundation of the Popol Vuh the document that retraces in mythical language the four ages or stages of civilization that all of America has undergone to some degree It also moves from the Popol Vuh into later times through myths and legends of the Aztec and Iroquois Myth and history are placed side by side in a scientific and imaginative approach that documents the correlation between pre historical and historical periods and the spiritual events that ushered them in as narrated in the myths and legends of North America This approach reconciles Western analytical consciousness with the Native American language of myths and legends All of this is placed first in the perspective of Maya spiritual tradition and then from the perspective that the twentieth century research of Rudolf Steiner brought to light especially in relation to the events that took place in Central America two thousand years ago about which only Rudolf Steiner has spoken The first part of the work explores events of 2 000 years ago and their consequences in the onset of Maya civilization The second part researches the rise of new spiritual influences around the time just before the arrival of Columbus in America At the extremes of the spectrum we find Aztec and Iroquois worldviews Both cosmologies have links subtle or obvious with the Popol Vuh whether continuing or reinterpreting its original message

This polarity carries momentous consequences for global social trends in modern world history Spiritual Turning Points of North American History brings a fresh perspective to North American history and the meeting of European and First Nations worldviews
