Bureau of Mines, 1910      *Inventing the German Nation in Travel Literature, 1738-1839* Karin Baumgartner, 2025 Far into the nineteenth century Germany was not yet a nation state but a conglomeration of principalities The causes and consequences of its belatedness compared to other European countries such as England and France have been much debated The present book breaks new ground by identifying travel literature as an important factor in the forging of a distinct and cohesive German identity well before political unification in 1871 First foreign travelers accounts travelogues guidebooks referred to and treated Germany as a distinct place even though it was still politically divided thus enabling German readers to imagine their fragmented nation as a conceptual whole Second Germans themselves began to explore their homeland and write travelogues that solidified the nascent sense of national identity Ethnographic descriptions from places and peoples far away further aided this process as Germans learned to view themselves through this particular lens Surveying a large corpus of German and some British and French travelogues travel handbooks and popular geographic texts and bringing to bear discourses of nationalism and geography including Edward Soja's seminal concept of Thirdspace Karin Baumgartner reveals what travel writing can tell us about conceptual changes in

Mackintosh,2019-01-08 A fascinating journey through the origins of American tourism In the early nineteenth century thanks to a booming transportation industry Americans began to journey away from home simply for the sake of traveling giving rise to a new cultural phenomenon the tourist In *Selling the Sights* Will B Mackintosh describes the origins and cultural significance of this new type of traveler and the moment in time when the emerging American market economy began to reshape the availability of geographical knowledge the material conditions of travel and the variety of destinations that sought to profit from visitors with money to spend Entrepreneurs began to transform the critical steps of travel deciding where to go and how to get there into commodities that could be produced in volume and sold to a marketplace of consumers The identities of Americans prosperous enough to afford such commodities were fundamentally changed as they came to define themselves through the consumption of experiences Mackintosh ultimately demonstrates that the cultural values and

market forces surrounding tourism in the early nineteenth century continue to shape our experience of travel to this day
