Made In Hungary Hungarian Contributions To Universal Culture:

Made in Hungary Andrew L. Simon, 1998 The multiple contributions of Hungarian society in the fields of art science technology and sports are highlighted here The Treatment of Hungarian Jewish Health Professionals in the Shadow of the Holocaust Julia Bock, 2019-08-05 This book explores the social medical and historical aspects of Hungarian Jewish doctors lives between the end of World War I and the start of World War II It also answers how it was possible for these doctors to treat patients when inmates themselves and what the reasons were for the unusually high percentage of Jewish youth choosing the medical profession in Hungary **László Zechmeister** Michaela Wirth, 2013-09-18 L zlo Zechmeister was one of the pioneers in chromatology He recognized the potential of the chromatographic method and made extensive use of it for his research about natural products In 1938 he founded the book series Progress in the Chemistry of Organic Natural Products which includes review articles on contemporary research by masters in their fields of expertise This text casts light on his life and his pioneering role in chromatography and provides more detailed insight on the book series *Archimedes to Hawking* Clifford Pickover, 2008-04-16 Archimedes to Hawking takes the reader on a journey across the centuries as it explores the eponymous physical laws from Archimedes Law of Buoyancy and Kepler s Laws of Planetary Motion to Heisenberg s Uncertainty Principle and Hubble s Law of Cosmic Expansion whose ramifications have profoundly altered our everyday lives and our understanding of the universe Throughout this fascinating book Clifford Pickover invites us to share in the amazing adventures of brilliant quirky and passionate people after whom these laws are named These lawgivers turn out to be a fascinating diverse and sometimes eccentric group of people Many were extremely versatile polymaths human dynamos with a seemingly infinite supply of curiosity and energy and who worked in many different areas in science Others had non conventional educations and displayed their unusual talents from an early age Some experienced resistance to their ideas causing significant personal anguish Pickover examines more than 40 great laws providing brief and cogent introductions to the science behind the laws as well as engaging biographies of such scientists as Newton Faraday Ohm Curie and Planck Throughout he includes fascinating little known tidbits relating to the law or lawgiver and he provides cross references to other laws or equations mentioned in the book For several entries he includes simple numerical examples and solved problems so that readers can have a hands on understanding of the application of the law A sweeping survey of scientific discovery as well as an intriguing portrait gallery of some of the greatest minds in history this superb volume will engage everyone interested in science and the physical world or in the dazzling creativity of these brilliant thinkers

History of Nonlinear Oscillations Theory in France (1880-1940) Jean-Marc Ginoux, 2017-04-18 This book reveals the French scientific contribution to the mathematical theory of nonlinear oscillations and its development The work offers a critical examination of sources with a focus on the twentieth century especially the period between the wars Readers will see that contrary to what is often written France s role has been significant Important contributions were made through both the

work of French scholars from within diverse disciplines mathematicians physicists engineers and through the geographical crossroads that France provided to scientific communication at the time This study includes an examination of the period before the First World War which is vital to understanding the work of the later period By examining literature sources such as periodicals on the topic of electricity from that era the author has unearthed a very important text by Henri Poincaré dating from 1908 In this work Poincaré applied the concept of limit cycle which he had introduced in 1882 through his own works to study the stability of the oscillations of a device for radio engineering The discovery of this text means that the classical perspective of the historiography of this mathematical theory must be modified Credit was hitherto attributed to the Russian mathematician Andronov from correspondence dating to 1929 In the newly discovered Poincaré text there appears to be a strong interaction between science and technology or more precisely between mathematical analysis and radio engineering This feature is one of the main components of the process of developing the theory of nonlinear oscillations Indeed it is a feature of many of the texts referred to in these chapters as they trace the significant developments to which France contributed Scholars in the fields of the history of mathematics and the history of science and anyone with an interest in the philosophical underpinnings of science will find this a particularly engaging account of scientific discovery and scholarly communication from an era full of exciting developments

Eastern Europe Richard Frucht, 2004-12-22 A contemporary analysis of the people cultures and society within the regions that make up Eastern Europe Eastern Europe An Introduction to the People Lands and Culture sheds light on modern day life in the 16 nations comprising Eastern Europe Going beyond the history and politics already well documented in other works this unique three volume series explores the social and cultural aspects of a region often ignored in books and curricula on Western civilization The volumes are organized by geographic proximity and commonality in historical development allowing the countries to be both studied individually and juxtaposed against others in the region The first volume covers the northern tier of states the second looks at lands that were once part of the Hapsburg empire and the third examines the Balkan states Each chapter profiles a single country its geography history political development economy and culture and gives readers a glimpse of the challenges that lie ahead Vignettes on various topics of interest illuminate the unique character of each country

National Narcissism Eric Beckett Weaver, 2006 National Narcissism offers a groundbreaking anthropological and sociological approach to nationalism through an exposé of the belief systems and psychology of extreme nationalists for whom nationalism is a form of religion This theoretical approach is illustrated with examples primarily taken from Hungary with a special focus in two chapters on the role of gender in nationalism The state of politics and society in Hungary is also examined in a way that steps beyond the usual simplistic flat narratives of what Hungarians are like by stressing the broad variety of viewpoints current in Hungarian society the milieu in which a small minority of extreme nationalists are able to make their voice heard out of proportion to their numbers or political support The theory offered by National Narcissism has wide ranging implications for the future

study of extremist nationalism in nation states throughout the world Sociologists anthropologists nationalism studies specialists social psychologists and historians of the recent past in Hungary will find that this theoretical book richly illustrated with examples from Hungarian society challenges positive and negative stereotypes about nationalism extremism post communism central and eastern Europe the European Union and not least about Hungarians themselves Hungarian Culture, Universal Culture József N. Szabó, 1999 Contending that the possibilities for regular diplomacy and foreign politics were narrow following the close of the Second World War for fairly obvious reasons i e Soviet U S tensions this work advances the novel argument that Hungary used cultural diplomacy to maintain some relations with countries that had been important to it before the war The author looks at official cultural and scientific efforts but also includes the work of civilian organizations and prominent civilians who weren't necessarily working at the behest of the Hungarian government A translated and revised version of Magyar Kultura Egyetemes Kultura Magyarország kulturdiplomaciai törekvései 1945 1948 Distributed by ISBS Annotation copyrighted by Book News Inc Portland OR More Than a Dream Rachel A.

Schildgen, 2010-08-26 The name Vilma Banky is often relegated to dusty history books fated to be mentioned only in passing Today her fame is eclipsed by the men she worked with and her life remains a mystery to even the most ardent silent film fan But she was a superstar plain and simple Movie mogul Sam Goldwyn saw in her what millions of audiences around the world would soon embrace the soft milk white hands corn silk hair and effortless femininity Charlie Chaplin was a fan as was John Gilbert President Calvin Coolidge Adolf Hitler and F Scott Fitzgerald The story of Vilma Banky is almost too fantastic but underneath it all given fame and opportunity she struggled to make things right Goldwyn's long obfuscated Hungarian Rhapsody reemerges from years of misconceptions to reveal what made her such an international sensation in the 20s

Cultures of International Exhibitions 1840-1940 Marta Filipová, 2017-07-05 Beyond the great exhibitions expositions universelles and world fairs in London Paris or Chicago numerous smaller yet ambitious exhibitions took place in provincial cities and towns across the world Focusing on the period between 1840 and 1940 this volume takes a novel look at the exhibitionary cultures of this period and examines the motivations scope and impact of lesser known exhibitions in for example Australia Japan Brazil as well as a number of European countries The individual case studies included explore the role of these exhibitions in the global exhibitionary network and consider their marginality related to their location and omission by academic research so far The chapters also highlight a number of important issues from regional or national identities the role of modernisation and tradition to the relationship between capital cities and provincial towns present in these exhibitions They also address the key topic of colonial exhibitions as well as the displays of arts and design in the context of the so called marginal fairs *Cultures of International Exhibitions 1840 1940 Great Exhibitions in the Margins* therefore opens up new angles in the way the global phenomenon of a great exhibition can be examined through the prism of the regional and will make a vital contribution to those interested in exhibition studies and related fields **The Universal**

Jewish Encyclopedia ... Isaac Landman, Simon Cohen, 1943 **Devrimden Sonra Birinci Yüzyıl: Yönetmenlerin İzinde Macar Sineması** Tolga Yalur, 2009-12-10 Macaristan'ın yakın tarihine bakınca devrim kelimesi iki farklı alt dönemde 1919 devrimi ve 1956 devrimi. Bazı kaynaklarda faizmin ortadan kalktığı ve sosyalizmin tekrar geldiği 1947'de devrim addedilir Kurumsal temellenişi bakımından 1919 devrimi bu kitabın başlıklarının ilk göndermesi. Ancak bu tarihte kamulaştırılan Macaristan sineması dünyada bir ilktir. 1956 ise Macaristan sinemasında şok edici referans alan bir tarih. Bu bakımdan 1956'da da Macaristan sinemasının başlangıcından koparmamak adına başlıkların ikinci göndermede bulunduğu temel devrim 1990'larda Demir Perde ülkelerindeki rejim değişikliklerine paralel olarak Macaristan sinemasında da nitel anlamda olumsuz bir çizime yansıyan. Fakat Macaristan'da uzun yıllar önce başlayan sinema geleneği ister sosyalist ister faşist ister kapitalist rejimlerde olsun toplumsal ve siyasi sorunlara değinmeyi bir görev olarak görür. Sosyo-politik ve tarihsel konulara duyarlı bir sinema geleneğinin gelişi her rejimde ve ideolojide olduğu gibi burada da sancılıdır. Fakat her dönemde sineması Macaristan'ın olagelen olayların tarihini ve insanı anlatmaya etkili yollarla devam eder denebilir. Toplumun dikkatine değer sorunları gönderilerek incelenir. Toplumsal hayatın her alanının kontrol altında olduğu bir dünyada hayatın kendinden beslenerek birden fazla boyutu irdeleyen ve izleyende şüpheli bir bakış açısı olan filmlemlerle sinema geleneğinin bu yirminci yüzyıl Macaristan'ına siyasi gelişmelere tarihe topluma ve kenarda kalmış karakterlere bakar. Macaristan'ın toplumsal ve siyasi olayları insan ve sorunları sinemada tarihten yazıncıdan belgeselciliğe ve biyografilerden beslenerek yeniden ve yeniden yorumlanır. **NHQ; the New Hungarian Quarterly** ,1983 **New Hungarian Quarterly** ,1983 **The Danube Swabians** G.C. Paikert, 2012-12-06 Sedulo curavi humanas actiones non ridere non lugere neque detestari sed intelligere SPINOZA This monograph is an attempt to present some information on the fabric and patterns of an ethnic minority group whose destiny was totally deflected by Hitler and his war. The people in question are the Danube Swabians, German populations who were so called because of their habitat in the middle Danube region of east central and south eastern Europe. Research for this study was done in 1964 in Hungary, Yugoslavia, Austria and the Federal Republic of Germany in which countries the author contacted persons of competence and made use of archives and other sources. He also attended the annual convention of the Danube Swabians in July 1964 in West Germany. In fact he himself had a small part in the events which he attempts to analyze here. From 1934 until 1944 he served in the Hungarian Ministry of Education in Budapest and headed for some years the department for the schooling of national minorities and also the department in charge of Hungary's cultural interchange. He resigned from the former post in 1939 and was ousted from the second when German troops occupied Hungary in March 1944. His personal recollections relating to the events during and after his tenure he left Hungary for England in June 1946 have been used to some extent in this study especially in Chapter X. **Generalni plan Beograda 1923** Zlata Vuksanović-Macura, 2014-09-16 This doctoral dissertation examines the process of preparing, elaborating and implementing Belgrade's 1923-24 General Urban Plan. The impact of design proposals from the 1921-1922 international competition on the

content and concept of the General Plan is analyzed and a comparison is made between the General Plan's ideas and its achieved results by taking a look at what hindered the Plan from being implemented As the capital of the Kingdom of Yugoslavia Belgrade's urban planning and development in the period between the two world wars are considered within the context of social and economic circumstances in the newly formed state Cultural Life in Hungary Zoltán Halász,1966
