Madness In Its Place:

Madness in its Place Diana Gittins, 2006-10-19 This fascinating study presents a unique history of psychiatry in the twentieth century. It brings together the memories and narratives of over sixty patients and workers who lived or were employed in Severalls Psychiatric Hospital, Essex, UK. Personal accounts are contextualised both in relation to wider developments and issues in twentieth century mental health and in relation to policies and changes in the hospital itself. Organised around the theme of space and place and drawing upon both quantitative and qualitative material, chapters deal with key areas such as gender divisions, power relations, patterns of admission and discharge, treatments and the daily lives and routines of patients and nurses of both sexes.

N-Space Larry Niven, 2007-08-21 This retrospective collection of stories from all phases of Niven's writing career is rich with gossip, storytelling, vigor and sheer science-fictional play.

The Humble Story of Don Quixote Cesáreo Bandera, 2006 Don Quixote is often called the first modern novel; many would argue it is the greatest novel ever written. But compared with other world masterpieces from the *Iliad* to *Paradise Lost* or from *Oedipus the King* to *Hamlet* or *Life is a Dream* for example, the storyline of Don Quixote is remarkably uninspiring and lowly: a middle-aged man becomes mad, reading novels, and makes a fool of himself by believing he is a hero. The first great modern novel is a warning about the reading and the writing of novels. In this original study by Cesáreo Bandera, the intimate connection between the simplicity and humility of the story and its greatness is explored. Other comparisons are also made: the story of the picaresque rogue on the one hand and the psychological insights of the pastoral novel on the other. Through these analyses, the meaning and significance of Cervantes' novel are developed. The book takes into critical account Mikhail Bakhtin's theory of the novel as well as Michel Foucault's views about madness and civilization in order to bring into relief the modernity of Don Quixote. From another angle, the contrasting views on human desire of such critics as Unamuno and René Girard become central to a new understanding of Don Quixote's madness as well as to the development of the main connection between the humility of the story and its greatness.

ABOUT THE AUTHOR Cesáreo Bandera, professor emeritus of Spanish literature at the University of North Carolina at Chapel Hill, is author of several books and numerous essays in English and Spanish, including *The Sacred Game: The Role of the Sacred in the Genesis of Modern Literary Fiction*.

PRAISE FOR THE BOOK The originality of Bandera's approach and the novelty of his focus are grounded not only on a solid knowledge of history and literary theory but also of philosophy, history of religion, anthropology, etc. Bandera's study attracts from its first pages by confronting the reader with concepts which are fundamental to an understanding of the culture and literature of the West in the 17th century.

Jos María Díaz Borque, Madrid, Universidad Complutense: We are dealing with a book different from all others that have come out on the occasion of the Fourth Centenary. It is full of intuitions, accurate judgments, and above all, it is organized and written by an author ready to make *tabula rasa* of all Cervantine bibliography in order to reexamine *ab ovo* the state of questions that are still relevant to those who study the best classical novel. Hector

Brioso Universidad de Alcal Bandera discusses the historical social and spiritual developments that in the Renaissance made a revival of the old epic an impossibility and paved the way to the invention of the modern novel He presents an immensely intelligent sensitive innovative and readable book on this immortal work Ren Girard Member of the French Academy Honorary President of the Colloquium on Violence and Religion Bandera offers an insightful analysis of Cervantes techniques including mimesis parody and irony Highly recommended M V Ekstrom Choice The book contains brilliant insights into the picaresque and the pastoral Julio Baena Renaissance Quarterly Professor Bandera enriches our understanding of the literature of the period with acute and instructive insights Edwin Williamson Bulletin of Spanish Studies

Given Time Jacques Derrida,1992 Is giving possible Is it possible to give without immediately entering into a circle of exchange that turns the gift into a debt to be returned This question leads Jacques Derrida to make out an irresolvable paradox at what seems the most fundamental level of the gift s meaning for the gift to be received as a gift it must not appear as such since its mere appearance as gift puts it in the cycle of repayment and debt Derrida reads the relation of time to gift

through a number of texts Heidegger's *Time and Being*, Mauss's *The Gift* as well as essays by Benveniste and Levi Strauss that assume Mauss's legacy. It is however a short tale by Baudelaire, *Counterfeit Money*, that guides Derrida's analyses throughout. At stake in his reading of the tale to which the second half of this book is devoted are the conditions of gift and forgiveness as essentially bound up with the movement of dissemination, a concept that Derrida has been working out for many years. For both readers of Baudelaire and students of literary theory, this work will prove indispensable.

The Architecture and Landscape of Health Julie Collins, 2020-03-24. The *Architecture and Landscape of Health* explores buildings and landscapes that were designed to treat or prevent disease in the era before pharmaceuticals and biomedicine emerged as first line treatments. Written from an architectural perspective, it examines the historical relationship between health and place through the emergence of dedicated therapeutic building types from the late eighteenth to the early twentieth century, a time when the environment was viewed as integral to the health of both the individual and the population. This book provides an overview of ideas surrounding health and place and their impact on architecture and designed landscapes. Different therapeutic buildings and places are examined, including public parks, asylums, sanatoria, leprosaria, quarantine stations, public baths, and healthy homes. Each chapter outlines the medical context, common therapies, a history of buildings designed in response to these, and an examination of how such places were perceived to have functioned. Illustrated using geographically and temporally diverse examples, the book includes designs drawn from locations across the world, including Europe, the Americas, Africa, Australia, and Asia. The *Architecture and Landscape of Health* identifies and examines moments in the conversation between health and design and is a timely look back on the resultant buildings and places offering insights which could inform the design of therapeutic places of the future. An ideal read for researchers, academics, and upper level postgraduate students interested in architecture and architectural history, particularly relating to healthcare design and medical history.
