## **Formulating Ideas**

Having a good idea, and having lots of good ideas is difficult, but a writer has to rely on a constant stream of good ideas, which they generate themselves. A good tip is to keep ideas jotted down on postcards, filed away for future use, so that the cupboard is never bare.

## **Collecting and Filing Cuttings**

One way of generating ideas is to constantly scan sources - magazines, papers, journals - for the germ of an idea. Anything you come across can be filed away for future use.

## **Interviewing**

Most articles will carry some interview material. It is this which makes the article fresh and live, and which gives it authenticity. Too many writers see features as a platform for their own opinions. The very best articles listen to others talking.

## **Writing, Drafting and Editing**

The process of drafting and polishing your article is a very personal one. Some people say they never plan first, some never rewrite, others do both. The computer has made it much easier to do planning, writing and editing all in one. But make no mistake - editing, sharpening, polishing your article, however you do it, is a very important stage.
