Prado-Alcalá, 2019-01-22 Catalyzed by the development of new neurobiological and behavioral techniques as well as new conceptual and theoretical approaches to the study of the relationship between brain and behavior research exploring brain functions enabling learning and memory has greatly accelerated in recent years The chapters in this book reflect current theoretical approaches to the study of brain and memory and provide new insights concerning the cellular bases of memory and the differential involvement of brain systems in different forms of memory By presenting up to date summaries of research investigating brain mechanisms underlying learning and memory these chapters help to place current findings in
