Forum, **The Space and Practice of Reading** Chin Ee Loh, 2017-02-10 Mirroring worldwide debates on social class, literacy rates and social change, this study explores the intersection between reading and social class in Singapore. One of the top scorers on the Programme for International Assessment (PISA) tests and questions the rhetoric of social change that does not take into account local spaces and practices. This comparative study of reading practices in an elite school and a government school in Singapore draws on practice and spatial perspectives to provide critical insight into how taken-for-granted practices and spaces of reading can be, in fact, unacknowledged spaces of inequity. Acknowledging the role of social class in shaping reading education is a start to reconfiguring current practices and spaces for more effective and equitable reading practices. This book shows how using localized, contextualized approaches sensitive to the home school, national and global contexts can lead to more targeted policy and practice transformation in the area of reading instruction and intervention. Chapters in the book include: Becoming a Reader, Home School Connections, Singaporean Boys Constructing Global Literate Selves, School Nation Connections, Levelling the Reading Gap, Socio-Spatial Perspectives. The book will be relevant to literacy scholars and

Instructional Models in Reading Steven A. Stahl, David A. Hayes, 2013-04-03 This book started with a simple idea examine models of reading instruction that have emerged during the past 20 years These models span a wide range of instruction representing a continuum from highly structured task analytic instruction to child centered and holistic instruction Each model has its own epistemology or views on how reading and instruction are to be defined The different epistemologies indicate different principles of instruction which in turn indicate different practices in the classroom Each model is also supported by a different research base In this volume leading proponents of these different models discuss their ideas about reading instruction thereby encouraging readers to make their own comparisons and contrasts The chapter authors seem to adopt the editors eclectic approach to some greater or lesser extent incorporating aspects of other models into their instruction as they see other goals Thus models of reading instruction are complex Complicating matters further is the fact that teachers hold their own models of reading which may or may not be congruent with those discussed here Although academically developed models influence college preservice and in service instruction teachers own models of reading filter the information that they take from what they learn from these perspectives By carefully examining these variables this book makes a firm contribution toward disciplined inquiry into what it means to teach reading
