RED SYSTEM OF THE CN MOLECULE. SUMNER P., PHILLIPS DAVIS (JOHN G.),2021 **The Red System of the CN Molecule** Sumner P. Davis,1963 *The Red System (A₂[π]-X₂[σ]) of the CN Molecule* Sumner P. Davis,John Gardner Phillips,1963 **The Red System of the Cn Molecule** Sumner P. Davis,John G. Phillips,2013-09 NASA Technical Translation ,1969 Technical Report - Jet Propulsion Laboratory, California Institute of Technology Jet Propulsion Laboratory (U.S.), **Molecular Spectra and Molecular Structure** K. Huber,2013-06-29 Since the publication in 1950 of Vol I Spectra of Diatomic Molecules of Molecular Spectra and Molecular Structure much progress has been made in the field While there have been some important refinements in the theory of diatomic molecular spectra most of the advances have been in the further exploration of individual spectra Not only has the number of molecules about which some spectroscopic data are available been increased by a factor of 2 to 3 but also the spectroscopic information about the molecules known in 1950 has been vastly extended This is due to the observation of new electronic states about three times as many as known before the enormous improvements in the accuracy of the constants of the states known in 1950 and the determination of higher order constants In view of the increasing use of spectroscopic information on diatomic molecules in other fields of physics in chemistry and in astrophysics it appeared desirable to prepare an up to date version of the table of molecular constants in the appendix of Vol I This updating proved to be far more time consuming than originally anticipated and it is only now 10 years that we are able to present such a table which instead after its initiation of the original 80 pages plus 30 pages of bibliography now fills a volume of 700 pages In the interest of economy and unlike the original version the new table has been produced by photo offset from the final manuscript The Swan System of the C₂ Molecule John G. Phillips,Sumner P. Davis,2023-11-15 *Studies in Physical Gas Dynamics* ,1968 **Spectra of Atoms and Molecules** Peter F. Bernath,2020-04-20 This volume emphasizes the fundamental principles of spectroscopy and teaches students how to interpret spectra NASA Technical Note ,1969 Handbook of Thermal Plasmas Maher I. Boulos,Pierre L. Fauchais,Emil Pfender,2023-02-20 This authoritative reference presents a comprehensive review of the evolution of plasma science and technology fundamentals over the past five decades One of this field's principal challenges has been its multidisciplinary nature requiring coverage of fundamental plasma physics in plasma generation transport phenomena under high temperature conditions involving momentum heat and mass transfer and high temperature reaction kinetics as well as fundamentals of material science under extreme conditions The book is structured in five distinct parts which are presented in a reader friendly format allowing for detailed coverage of the science base and engineering aspects of the technology including plasma generation mathematical modeling diagnostics and industrial applications of thermal plasma technology This book is an essential resource for practicing engineers research scientists and graduate students working in the field International Compendium of Numerical Data Projects CODATA (The Committee on Data for Science and Technology

of the International Council of Scientific Unions), 2012-12-06 At the time of its establishment in 1966 by the International Council of Scientific Unions ICSU the Committee on Data for Science and Technology CODATA was given the basic mission of promoting and encouraging on a worldwide basis the production and distribution of compendia and of collections of critically selected numerical data on substances other forms of interest and importance to science and technology To accomplish this aim the following tasks were assigned to CODATA 1 To ascertain on a worldwide basis what work on compilation of numerical data is being carried on in each country and under each union and from this information to prepare and distribute a Directory or Compendium of the Data Compiling Projects and Related Publications of the World 2 To achieve coordination of existing programs and to recommend new programs 3 To encourage from all appropriate sources financial support for work on compilation 4 To encourage the use of internationally approved symbols units constants terminology and nomenclature 5 To encourage and coordinate research on new methods for preparing and disseminating data for science and technology In its first two years of operation 1966 to 1968 in Washington D c U S A CODATA fortunately had as its Director Dr GUY WADDINGTON who was also Director of the Office of Critical Tables of the National Research Council NRC U S A Dr **Technical Papers**, 1964 *Magnetic Atoms and Molecules* William Weltner, 1989-01-01 This comprehensive graduate level text by a leading researcher in atomic and molecular spectroscopy explores the electron spin resonance theory of randomly oriented molecules I recommend it highly American Scientist 119 illustrations
