Practical Life More Than Meets the Eye Thomas L. Larry,2023-06-12 Misunderstandings of biblical creation texts have resulted from a lack of appreciation of the cultural context of the inspired writers Views of nature have changed greatly over history At the time of ancient Israel people gazed up to the star studded firmament that separated the waters above from the waters below and the land Land was bounded by sea which merged with the waters above at the horizon The universe was close and intimate Pagan peoples believed gods occupied this realm and accounted for much of observed cause and effect Biblical writers also viewed nature in this context However they were distinctly monotheistic writing of a supreme God who made and gave meaning to everything God chose a covenant relationship with a select people This relationship was based on belief in God faith Fast forward through many twists and turns of intellectual history and we come to the modern scientific age We picture our home as a spherical planet rotating once a day and orbiting the sun yearly We gaze out at a vast space seeing distant suns the stars and enormous collections of stars galaxies Light travels at a known speed thus astronomers peer back to times billions of years in the past We need to avoid concordism conflating modern views with the biblical text The concordism error has occurred throughout church history up to the present The book addresses this as well as some discoveries of modern science that were unknown to ancient people Such discoveries give us good reason to bow in awe before the Creator Even though mankind s views of nature have greatly changed with time the message of the Bible is the same We come to God through faith as did Abraham who saw more than meets the eye *Scripture* Ronald D. Witherup,2006 This book describes the history of the Dogmatic Constitution on Divine Revelation its content its importance and how it has helped to direct the future of Roman Catholic biblical studies *Early Christianity and Greek Paideia* Werner Jaeger,1985 This small book the last work of a world renowned scholar has established itself as a classic It provides a superb

overview of the vast historical process by which Christianity was Hellenized and Hellenic civilization became Christianized Werner Jaeger shows that without the large postclassical expansion of Greek culture the rise of a Christian world religion would have been impossible He explains why the Hellenization of Christianity was necessary in apostolic and postapostolic times points out similarities between Greek philosophy and Christian belief discuss such key figures as Clement Origen and Gregory of Nyssa and touches on the controversies that led to the ultimate complex synthesis of Greek and Christian thought
