internal auditory canal growing from the canal into the CPA eventually causing brainstem compression Their incidence is around 2.5 per 100 000 Around 70% of tumors do not grow following diagnosis but those that do or those that are already large at presentation are usually treated either with stereotactic radiosurgery or microsurgical resection Vestibular schwannomas have been extensively investigated over the years with nearly 10 000 peer reviewed papers relating to them on Pubmed Despite this plethora of data there are very few books that assimilate the literature to provide a comprehensive readable and contemporary overview of their management This book aims to meet these requirements covering both sporadic and neurofibromatosis type 2 vestibular schwannomas The chapters within the book will cover all aspects of the diagnosis and management of vestibular schwannomas Opening chapters provide a historical back drop followed by current state of the art of molecular biology histopathology and genomics relating to vestibular schwannomas A comprehensive section related to the assessment of patients with vestibular schwannomas will highlight the multidisciplinary approach to the management of these tumors This will set out some of the cutting edge research currently being undertaken in prediction of tumor growth using novel biological and radiological markers The next section focuses on the treatment of vestibular schwannomas This will make up the largest proportion of the book and will cover all treatment modalities from observation through to stereotactic radiosurgery and microsurgical resection Lastly will be a section focusing on rehabilitation of neurological deficit arising as a result of the disease or its treatment Consolidates best practice on diagnosis and treatment of vestibular schwannomas Includes both sporadic and neurofibromatosis type 2 vestibular schwannomas Covers stereotaxic radiosurgery and microsurgical resection Discusses molecular biology histopathology and genomics Presents rehabilitation for neurological deficits resulting from schwannomas and treatment

Principles and Practice of Lasers in Otorhinolaryngology and Head and Neck Surgery V. Oswal ,M. Remacle,S. Jovanvic,S.M. Zeitels,J.P. Krespi,C. Hopper,2014-01-24 Foreword In this era s informational paradigm while pondering the considerations to be penned in this foreword the relevance of a text such as this emerged progressively as the focal point After all for years one established source for accessing large amounts of valuable information had been the Encyclopaedia Britannica a printed tome which is no longer relevant Instant access to the latest scientific information is freely available to all with an internet So what can this text provide that cannot be readily accessed In contemplating given topics the Editors as most certainly occurred in this publication chose clinical authorities to author chapters in their areas of expertise The experienced clinician often finds such a forum a unique opportunity to reflect on years of knowledge acquisition and then render an insightful discourse on the lineage of his her current understanding of the topic On the other side of the coin the reader instantly acquires a knowledge base which was validated with an exhaustive literature search and gains the senior authors perspective of it A less experienced author will benefit from thoroughly reviewing the currently available science and technology and moreover gain experience in scientific writing In the latter scenario the senior author is at once mentor and expert Under ordinary circumstances from the concept outline submission to a publisher the time line to completion of the text is approximately one and a half to two years Recruiting and assigning authors awaiting late manuscript submissions and editing are unquestionably time consuming Yet a passionate dedicated Editor will take seemingly varied submissions and script them into a worthy finished product Such was the case with this publication The end result is a superbly structured text covering most of the concepts relating to the topic in a format that is both logical and intuitive At the risk of some redundancy I share with you my thoughts on some of the significant number of new additions and improvements made to this second edition The chapter on risk management is a welcome contribution The rationale for the shift in the current decision tree for laryngeal cancer as it relates to macro versus micro margins improvements in voice quality and the choice of initial therapeutic considerations are appropriately vetted The rethinking of HPV associated malignancies is a new and most important addition Zeitels presentation of angiolytic lasers for benign and malignant pathology is state of the art I particularly enjoyed reading about lasers and the association with tropical diseases The chapters on robotic surgery non invasive cartilage reshaping and photo diagnostics puts the latest technical innovation

in our discipline into perspective The excellent illustrations and photographs are a bonus There are other areas that could be mentioned e g paediatrics however the aforementioned has more than adequately established the tenor of the text n their quest to provide a one stop knowledge base of a reference quality it is inescapable that the size of the final proof would surpass the typical numbers of between four and five hundred pages for the hard bound volume Tightening the text by removing some peripheral material would deprive the book its very objective of a reference quality publication The obvious solution was to present the work in a set of two volumes and the editors and the publishers have to be congratulated in achieving this seamlessly The natural anatomical split provides the reader with a convenience of picking up the volume of relevance for the task at hand An unusual feature is the inclusion of MCQs after each chapter to serve as a test for recall of knowledge the result of which can be assessed simply by going back to the chapter The Editors and the publishers have exploited the now ubiquitous electronic media network to their advantage Operating on various platforms a dedicated website will complement the book with updates operative videos and means of communication to share the knowledge globally It was the focus of this brief foreword to explore the relevance of this text in the current informational climate It provides the essential foundation for informed thought on this topic Agree or disagree with the information contained within the reader has acquired the knowledge to be able to do such With this text you will be rewarded for sitting in your most comfortable chair thumbing through the pages and sensing the new print Immediately understood will be the time and effort it took to complete a text of this calibre Read the chapters first that initially appeal to you and then without question you will read the remainder This book should be in the library of any serious student of the subject I feel privileged to have been asked to write the foreword Marshall Strome *National Library of Medicine Audiovisuals Catalog* National Library of Medicine (U.S.), *Federal Grants and Contracts for Unclassified Research in the Life Sciences* National Science Foundation (U.S.),1958 Issue for Fiscal year 1954 accompanied by separately published section with title Projects listed by agencies **List of International and Foreign Scientific and Technical Meetings** National Science Foundation (U.S.).
