Jules Verne's imaginative novels of the mid-nineteenth century met with international success, whetting the public's appetite for fantastic fiction rooted in actual fact—a craving that H. G. Wells satisfied with his visionary stories. This compilation presents more than two dozen early tales by Verne's and Wells's immediate predecessors, contemporaries, and descendants, focusing on the middle period when the genre was at its most enterprising and exuberant. Originally published between 1835 and 1924, the stories offer early interpretations of the futuristic societies, rogue stars, rebellious machines, and other now-familiar themes of speculative fiction. Featured authors include Edgar Allan Poe, Nathaniel Hawthorne, Ambrose Bierce, H. G. Wells, Jack London, and Sir Arthur Conan Doyle, as well as lesser-known writers. Brian Stableford, a legendary science fiction author and editor, selected the stories for which he provides an informative Introduction and brief biographies for each author. **The Emergence of the Fourth Dimension** Mark Blacklock, 2018-04-05 The Emergence of the Fourth Dimension describes the development and proliferation of the idea of higher-dimensional space in the late nineteenth and early twentieth centuries. An idea from mathematics that was appropriated by occultist thought, it emerged in the fin de siècle as a staple of genre fiction and influenced a number of important Modernist writers and artists. Providing a context for thinking of space in dimensional terms, the volume describes an active interplay between self-fashioning disciplines and a key moment in the popularisation of science. It offers new research into spiritualism and the Theosophical Society and studies a series of curious hybrid texts. Examining works by Joseph Conrad, Ford Madox Ford, H. G. Wells, Henry James, H. P. Lovecraft, and others, the volume explores how new theories of the possibilities of time and space influenced fiction writers of the period and how literature shaped and was in turn shaped.

by the reconfiguration of imaginative space occasioned by the n dimensional turn A timely study of the interplay between philosophy literature culture and mathematics it offers a rich resource for readers interested in nineteenth century literature Modernist studies science fiction and gothic scholarship *Scientific Romances*, 1925 **Before Einstein** Elizabeth L. Throesch, 2017-01-02 Before Einstein brings together previous scholarship in the field of nineteenth century literature and science and greatly expands upon it offering the first book length study of not only the scientific and cultural context of the spatial fourth dimension but also the literary value of four dimensional theory In addition to providing close critical analysis of Charles Howard Hinton s *Scientific Romances* 1884 1896 Before Einstein examines the work of H G Wells Henry James and William James through the lens of four dimensional theory The primary value of Hinton s work has always been its literary and philosophical content and influence rather than its scientific authority It is certain that significant late nineteenth century writers and thinkers such as H G Wells William James Olive Schreiner Karl Pearson and W E B Du Bois read Hinton Others including Henry James Joseph Conrad and Ford Madox Ford were familiar with his ideas Hinton s fourth dimension appealed to scientists spiritualists and artists and particularly at the end of the nineteenth century the interests of these different groups often overlapped Truly interdisciplinary in scope Before Einstein breaks new ground by offering an extensive analysis of four dimensional theory s place in the shared history of Modernism The Monist Paul Carus, 1902 Vols 2 and 5 include appendices About Time Paul Davies, P. C. W. Davies, 1996 With wit and clarity the author of more than 20 popular science books including *God and the New Physics* and *The Last Three Minutes* now explores the riddle of time examining the consequences of Einstein s theory of relativity and offering startling suggestions about what recent research may reveal 50 line drawings **The Astral Body and Other Astral Phenomena** Arthur Edward Powell, 1926 Time, Tense, and Reference Aleksandar Jokic, Quentin Smith, 2003-09-12 Among the many branches of philosophy the philosophy of time and the philosophy of language are more intimately interconnected than most yet their practitioners have long pursued independent paths This book helps to bridge the gap between the two groups As it makes clear it is increasingly difficult to do philosophy of language without any metaphysical commitments as to the nature of time and it is equally difficult to resolve the metaphysical question of whether time is tensed or tenseless independently of the philosophy of language Indeed one is tempted to see philosophy of language and metaphysics as a continuum with no sharp boundary The essays which were written expressly for this book by leading philosophers of language and philosophers of time discuss the philosophy of language and its implications for the philosophy of time and vice versa The intention is not only to further dialogue between philosophers of language and of time but also to present new theories to advance the state of knowledge in the two fields The essays are organized in two sections one on the philosophy of tensed language the other on the metaphysics of time

From Modernity to Cosmodernity Basarab Nicolescu, 2014-01-01 Offers a new paradigm of reality based on the interaction between science culture spirituality religion and society The quantum biological and information revolutions of

the twentieth and twenty first centuries should have thoroughly changed our view of reality yet the old viewpoint based on classical science remains dominant reinforcing a notion of a rational mechanistic world that allows for endless progress In practice this view has promoted much violence among humans Basarab Nicolescu heralds a new era cosmodernity founded on a contemporary vision of the interaction between science culture spirituality religion and society Here reality is plastic and its people are active participants in the cosmos and the world is simultaneously knowable and unknowable Ultimately every human recognizes his or her face in the face of every other human being independent of his or her particular religious or philosophical beliefs Nicolescu notes a new spirituality free of dogmas and looks at quantum physics literature theater and art to reveal the emergence of a newer cosmodern consciousness Scientific Romances ,1887 **Anthropocene**

Reading Tobias Menely,Jesse Oak Taylor,2017-10-13 Few terms have garnered more attention recently in the sciences humanities and public sphere than the Anthropocene the proposed epoch in which a human signature appears in the lithostratigraphic record Anthropocene Reading considers the implications of this concept for literary history and critical method Entering into conversation with geologists and geographers this volume reinterprets the cultural past in relation to the anthropogenic transformation of the Earth system while showcasing how literary analysis may help us conceptualize this geohistorical event The contributors examine how a range of literary texts from The Tempest to contemporary dystopian novels to the poetry of Emily Dickinson mediate the convergence of the social institutions energy regimes and planetary systems that support the reproduction of life They explore the long standing dialogue between imaginative literature and the earth sciences and show how scientists novelists and poets represent intersections of geological and human timescales the deep past and a posthuman future political exigency and the carbon cycle Accessibly written and representing a range of methodological perspectives the essays in this volume consider what it means to read literary history in the Anthropocene Contributors include Juliana Chow Jeffrey Jerome Cohen Thomas H Ford Anne Lise Fran ois Noah Heringman Matt Hooley Stephanie LeMenager Dana Luciano Steve Mentz Benjamin Morgan Justin Neuman Jennifer Wenzel and Derek Woods

Lunar Science Timothy Harley,1886 Historical Dictionary of Science Fiction Literature Brian Stableford,2004-04-19 This reference tracks the development of speculative fiction influenced by the advancement of science and the idea of progress from the eighteenth century to the present day The major authors and publications of the genre and significant subgenres are covered Additionally there are entries on fields of science and technology which have been particularly prolific in provoking such speculation The list of acronyms and abbreviations the chronology covering the literature from the 1700s through the present the introductory essay and the dictionary entries provide science fiction novices and enthusiasts as well as serious writers and critics with a wonderful foundation for understanding the realm of science fiction literature The extensive bibliography that includes books journals fanzines and websites demonstrates that science fiction literature commands a massive following **The Spectator** ,1886 **Hardwicke's Science-gossip** Mordecai Cubitt Cooke,John

Eller Taylor, 1885 **H. G. Wells, Modernity and the Movies** Keith Williams, 2007-12-01 This book investigates Wells's interest in cinema and related media technologies by placing it back into the contemporary cultural and scientific contexts giving rise to them. It plugs a gap in understanding Wells's contribution to exploring and advancing the possibilities of cinematic narrative and its social and ideological impacts in the modern period. Previous studies concentrate on adaptations; this book accounts for the specifically proto-cinematic techniques and concerns of Wells's texts. It also focuses on contemporary film making in dialogue with his ideas. Alongside Hollywood's later transactions, it gives equal weight to neglected British and continental European dimensions. Chapter 1 shows how early writings *The Time Machine* and short stories feature many kinds of radically defamiliarised vision. These constitute imaginative speculations about the forms and potentials of moving image and electronic media. Chapter 2 discusses the power of voyeurism, absent presence and the disjunction of sound-image reproduction implied in *The Invisible Man* and its topical politics, updated in notable screen versions. Chapter 3 extends this to dystopian warnings of systematic surveillance, broadcasting of celebrity personae and post-literate video culture in *When the Sleeper Wakes*, a crucial template for urban futures on film. Chapter 4 analyses Wells's belated return to screenwriting in the 1930s. It accounts for his broadbrow ambition of mediating between popular and avant-garde tendencies to promote his cause and its mixed results in *Things to Come*, *The Man Who Could Work Miracles* etc. Chapter 5 finally surveys Wells's legacy on both small and large screens. It considers whether, as well as being raided for scenarios for spectacular effects, his subtexts still nourish an evolving tradition of alternative SF which duly critiques the innovations and applications of its host media.
