Scientific American Archive Online Sciamarchive.Org Staff, WWW Sciamarchive Org, 2001-01-01 **Scientific American**, 1897 **Scientific American**, 2008 *Steampunk Film* Robbie McAllister, 2019-03-07 *Steampunk Film A Critical Introduction* is a concise and accessible overview of steampunk's indelible impact within film and acts as a case study for examining the ways with which genres hybridize and coalesce into new forms. Since the beginning of the 21st century a series of high profile and big budget films have adopted steampunk identities to re-imagine periods of industrial development into fantastical histories where future meets past. By calling this growing mass cultural fetishism for anachronistic machines into question this book examines how a retro futuristic romanticism for technology powered by cogs pistons and steam engines has taken center stage in blockbuster cinema. As the first monograph to consider cinema's unique relationship with steampunk it places this burgeoning genre in the context of ongoing debates within film theory each of which reflecting the movement's remarkable interest in reengineering historical technologies. Rather than acting as a niche subculture Robbie McAllister argues that steampunk's proliferation in mainstream filmmaking reflects a desire to reassess contemporary relationships with technology and navigate the intense changes that the medium itself is experiencing in the 21st century.

The Ecology of American Noir Katrina Younes, 2025-04-07 This volume investigates the relationship between the conventions of noir fiction and film and its sub types in relation to environmental crises. Dr Younes addresses questions that not only allow readers to re-read early hardboiled literature and neo noir films but also help identify a new sub genre of noir and develop an ecocritical methodology eco noir. This text traces the development of strategies of mapping urban blight and environmental deterioration in classic hardboiled fiction of the 1940s neo noir films of the 1970s and eco noir texts of the post millennial period. Introducing the concept of eco noir as both a sub genre and fictional form as well as a methodology the volume develops a new way of understanding the relationship between noir and climate fiction texts. Through a close reading of hardboiled neo noir and eco noir texts including those by Dashiell Hammett Raymond Chandler Robert Towne Kim Stanley Robinson and Jeff VanderMeer it asks and addresses the question how does each sub genre of noir map the noir atmosphere of the private investigator's natural setting in terms of environmental toxicity. *The Ecology of American Noir* contributes to critical conversations in both noir and ecocritical scholarship making clear how a new understanding of noir as defined through environmental and atmospheric conditions invites readers viewers and scholars of the genre to generate meaningful dialogues about our decaying and deteriorating environment.
