the hazards that face us in Surviving Armageddon he guides us through the major threats assessing the solutions that have been proposed from the reasonable to the bizarre There really are ways in which we can perhaps not prevent but limit the damage caused by future disasters he concludes As a volcanologist McGuire has sensed at first hand the dangers of volcanic eruptions and he was deeply involved in the scientific analysis of the Asian tsunami In this lively narrative he combines the science behind natural hazards with enthralling accounts of his own experiences and narrow escapes while working in some of the most dangerous parts of the world He gives us a down to Earth view of how we might just deflect Armageddon and live to tell the tale
