Courtship, Marriage, and Divorce in Scotland, 1855-1939 Eleanor Gordon, Jeff Meek, Katie Barclay, 2025-10-25 This is the first book length study of the history of working class courtship and marriage in Scotland from the establishment of civil registration to the introduction in 1939 of legislation which abolished irregular marriage and introduced civil marriage Adopting a life course approach the book explores the social economic and cultural contexts of romantic partnerships from courtship through to marital or family dissolution Drawing from a wide range of sources that capture official accounts and discourses on the one hand and the testimony and experience of working class people on the other the book offers a uniquely broad and textured view of courtship and marriage in this period In so doing it advances recent historiographical debates surrounding marriage in the Anglophone world particularly the mutability of love and whether the late nineteenth and early twentieth centuries constituted a social and cultural turning point for the working classes in terms of choice of marriage partner the nature of the marital relationship and the parent child relationship The book also engages with debates about extra marital sexual activity in the nineteenth and early twentieth centuries whether the family was more or less stable than the contemporary family and the different ways that marriages broke down before the advent of divorce reform This has important implications for wider European and North American historiography and raises timely questions about the primacy of the traditional family in policy and public discourse **The History of Scotland During the Reigns of Queen Mary**
