International Handbook of Internet Research Jeremy Hunsinger, Lisbeth Klastrup, Matthew Allen, 2010-06-17 Internet research spans many disciplines From the computer or information sciences through engineering and to social sciences humanities and the arts almost all of our disciplines have made contributions to internet research whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop software and hardware for the network The possibility and extent of contributions of internet research vary across disciplines as do the purposes methods and outcomes Even the epistemological underpinnings differ widely The internet then does not have a discipline of study for itself It is a field for research Baym 2005 an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this field research ethics disciplinary conventions local and national norms customs laws borders and so on Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation

The New Politics of Class Prof Klaus Eder,1993-06-10 Are contemporary societies organized by class In recent years the apparent fragmentation of established class structures and the emergence of new social movements in particular the women s movement and environmentalism have altered the traditional expressions of class in society At the same time these changes have posed fundamental questions for the concept of class in sociology and political science In this major reassessment Klaus Eder offers a new perspective on the status of class in modernity Drawing on a critique of Bourdieu Touraine and Habermas he outlines a cultural conception of class as the basis for understanding contemporary societies His model reevaluates the role of the middle classes traditionally the crux of class analysis and links class to social theories of power and cultural capital The result is a cultural theory of class which incorporates the changing forms of collective action and the new social movements of contemporary societies

Fast Families, Virtual Children Ben Agger,Beth Anne Shelton,2016-01-20 The Internet cell phones and other technologies have changed the ways in which people conduct their family lives raise children and navigate the blurry boundary between work and home Private life is colonized by employers teachers corporations family time is taken up by work homework and shopping What it means to be parents and children has changed dramatically This book shows how the nurturance of family has increasingly become a willful radical idea in an era of pervasive technology The authors analyze important trends including the acceleration and attenuation of childhood and offer a children s bill of rights and accompanying parental responsibilities

The Sociology of Disruption, Disaster and Social Change Hendrik Vollmer,2013-04-18 In the wake of disruption and disaster cooperation among members of a collective is refocused on matters of status membership and the formation of coalitions In an important contribution to sociological theory Hendrik Vollmer emphasizes the processes through which disruptions not only affect but also transform social order Drawing on Erving Goffman s understanding of framing and the interaction order as well as from a range of insights from contemporary sociological theory and ethnographic historical and organizational research Vollmer addresses the dynamics of disaster and disaster response within the framework of a

Luke, 1999 The world that was revolutionized by industrialization is being remade by the information revolution But this is mostly a revolution from above increasingly shaped by a new class of technocrats experts and professionals in the service of corporate capitalism Using Marx as a touchstone Timothy W Luke warns that if communities are not to be overwhelmed by new class economic and political agendas then the practice of democracy must be reconstituted on a more populist basis However the galvanizing force for this new more community centered populism will not be the proletariat as Marx predicted nor contemporary militant patriotic groups Rather Luke argues that many groups unified by a concern for ecological justice present the strongest potential opposition to capitalism Wide ranging and lucid Capitalism Democracy and Ecology is essential reading in the age of information

(Inter)Facing Death Sam Han, 2019-10-16 In modern times death is understood to have undergone a transformation not unlike religion Whereas in the past it was out in the open it now resides mostly in specialized spaces of sequestration funeral homes hospitals and other medical facilities A mainstay in so called traditional societies in the form of ritual practices death was usually messy but meaningful with the questions of what happens to the dead or where they go lying at the heart of traditional culture and religion In modernity however we are said to have effectively sanitized it embalmed it and packaged it but it seems that death is back In the current era marked by economic political and social uncertainty we see it on television on the Internet we see it almost everywhere Inter Facing Death analyzes the nexus of death and digital culture in the contemporary moment in the context of recent developments in social cultural and political theory It argues that death today can be thought of as interfaced that is mediated and expressed in various aspects of contemporary life rather than put to the side or overcome as many narratives of modernity have suggested Employing concepts from anthropology sociology media studies and communications Inter Facing Death examines diverse phenomena where death and digital culture meet including art online suicide pacts the mourning of celebrity deaths terrorist beheadings and selfies Providing new lines of thinking about one of the oldest questions facing the human and social sciences this book will appeal to scholars and students of social and political theory anthropology sociology and cultural and media studies with interests in death Democracy in an Age of Corporate Colonization Stanley Deetz, 1992-01-01 According to Deetz our obsolete understanding of communication processes and power relations prevents us from seeing the corporate domination of public decision making For most people

issues of democracy representation freedom of speech and censorship pertain to the State and its relationship to individuals and groups and are linked to occasional political processes rather than everyday life decisions This work reclaims the politics of personal identity and experience within the work environment as a first step to a democratic form of public decision making appropriate to the modern context
