Cultural, Existential and Phenomenological Dimensions of Grief Experience Allan Køster, Ester Holte Kofod, 2021-12-30 This innovative volume examines the phenomenological existential and cultural dimensions of grief experiences. It draws on perspectives from philosophy, psychology and sociocultural studies to focus on the experiential dimension of grief moving beyond understanding from a purely mental health and psychiatry perspective. The book considers individual, shared and collective experiences of loss. Chapters explore the intersections between the profound existential experiences of bereavement and how this is mediated by sociocultural norms and practices. It points to new directions for the future conceptualization and study of grief particularly in the experiential dimension. Drawing on a range of interdisciplinary perspectives, this important book will appeal to academics, researchers and students in the fields of death and bereavement studies, wellbeing and mental health, philosophy and phenomenological studies.

Selving Irene Fast, 2013-05-13 In *Selving: A Relational Theory of Self Organization* Irene Fast invokes the basic distinction between the self as me and the self as I in order to develop a contemporary theory of the self as subject. In a return to Freud's clinical finding that all psychological processes are personally motivated, she elaborates a notion of the I self that is intrinsically dynamic and relational. Within this conception, our perceiving, thinking, feeling and acting are not what our self does; rather, they are what our self is. According to Fast, the basic unit of the dynamic I self of selving is a scheme of personally motivated interaction between self and nonself. This notion, which comprehends development and developmental failure as a product of integration and differentiation among discrete I schemes, provides a radically new framework for understanding those dynamic phenomena that Freud included within his structural model of the mind and that contemporary theorists have addressed within object relational perspectives. Via the notion of selving, Fast likewise brings fresh insight to a host of issues that have engaged psychoanalysts and developmental psychologists in recent years. These topics include the place of bodily experience in a relational model of mind, the organization of self as simultaneously individual and relational, the formulation of a constructivist model of psychic structure among others. *Selving* is not only a lucid demonstration of how

a relational theory of self can reorder clinical observations in conceptually and therapeutically illuminating ways It is also a convincing demonstration of how a constructivist model emphasizing the interactive nature of meaning making provides bridges to Piagetian theory developmental research and observational infancy studies Studies in the Psychology of Sex: Erotic symbolism; the mechanism of detumescence; the psychic state in pregnancy Havelock Ellis,1906 The Atlantic Monthly ,1921 *Proceedings, Abstracts of Lectures and a Brief Report of the Discussions of the National Teachers' Association, the National Association of School Superintendents and the American Normal School Association* National Education Association of the United States,1910 **The Journal of Proceedings and Addresses of the National Educational Association** National Educational Association (U.S.),1910 **Proceedings of the Annual Meeting - National Education Association of the United States** National Education Association of the United States,1910
