*Hap and Hazard and the End of the World* Diane DeSanders,2018-01-09 Diane DeSanders s genius lies in her ability to capture the intimate interiority of a very particular childhood while at the same time interrogating

larger questions of class race and religion Hap and Hazard and the End of the World is a gorgeous profoundly original novel Dawn Raffel author of Carrying the Body and The Secret Life of Objects Rollicking tilted and transporting As the young narrator tries to manage her fraying family war wounded father suffering mother misbehaving relatives galore DeSanders takes us deeper always with such tenderness and beautiful observation into the ways we shape a narrative that keeps us whole Victoria Redel author of Loverboy and Before Everything For Dick and Jane Dallas after World War II is a place of promise and prosperity the first home air conditioners are making summertime bearable and Dick s position at his father s business the Cadillac dealership is assured Jane has help with the house and the children and garden parties and holiday celebrations are spirited social affairs For the oldest of their three daughters however life is full of frustrating mysteries The stories the adults tell her don t make sense Too curious for comfort she finds her questions only seem to annoy them Why won t they tell the truth about Santa What is that Holy Spirit business and what is the difference between an angel and a ghost Why is her mother often so tense and sad And why does her father keep flying into violent rages Hap and Hazard and the End of the World is an intimate finely crafted novel about the innocence and vulnerability of childhood and the dangers posed by adults who cannot cope with life s complexities It is also about the ingenuity born of loneliness and neglect and the surprising strange beauty of the world A fifth generation Texan Diane DeSanders is a history buff theater lover poet mother and grandmother Between careers as a history teacher and antiques dealer she has worked in regional theater in almost every capacity She now writes gardens and sings in Brooklyn New York This is her first novel      General Science Quarterly ,1922      *Improving Personal and Organisational Performance in Social Work* Jane Holroyd,2012-07-06 An introduction to performance management for social workers      *The SAGE Handbook of Counselling and Psychotherapy* Colin Feltham,Ian Horton,2006-01-05 The SAGE Handbook of Counseling and Psychotherapy Second Edition is the most comprehensive text of its kind and an essential resource for trainees and practitioners alike Comprising succinct and easy to access contributions the Handbook describes not only the traditional skills and theoretical models but also the most common client concerns brought to therapy and the particular skills required for different practice settings and client groups      **Feeling Machines** Shawn Bender,2024-11-19 In recent years debates over healthcare have accompanied rapid advances in technology from the expansion of telehealth services to artificial intelligence driven diagnostics In this book Shawn Bender delves into the world of Japanese robots engineered for care Care robots kaigo robotto emerged early in the 21st century when roboticists began converting assembly line technologies into responsive machines for older adults and people with disabilities These robots are meant to be felt and programmed to feel While some greet them with enthusiasm others fear that they might replace a fundamentally human task Based on fieldwork in Japan Denmark and Germany Bender traces the emergence of care robots in Japan and examines their impact on therapeutic practice around the world Social science scholarship on robotics tends to be either speculative imagining life together with robots or experimental observing robot human interaction in laboratories

or through short term field studies Instead Bender follows roboticists developing technologies in Japan and travels with the robots themselves into everyday sites of care tracking the integration of robots into institutional care and the connection of care practice to robotics development By exploring the application of Japanese robotics across the globe *Feeling Machines* highlights the entanglements of therapeutic practice and technological innovation in an age of more than human care

Knowledge as a Feeling Troy A. Swanson, 2023-05-08 Much of information science theory assumes a type of rationality in how individuals process the world around them but the impact of misinformation and disinformation along with the polarization of society into competing information factions calls for new understandings around our relationships to information Advances in neuroscience and psychology shed new light on how the brain processes information using both conscious and unconscious systems Current theory in neuroscience emphasizes that the mind is not a unified whole but a network of networks constructing reality to anticipate needs Knowledge is not a rational process but centers around the feeling of knowing which is the net output of competing brain processes The feeling of knowing assumes a group context and offers a social epistemological stance that judges knowledge within this group context With knowledge built into groups power dynamics allow work to be accomplished but also privilege some group members over others The feeling of knowing has significant implications for information science challenging theoreticians and practitioners to reconsider how individuals process information For information behavior the feeling of knowing offers a fuller picture looking at conscious and unconscious processing in the production of knowledge For information literacy the feeling of knowing sheds light on how individuals evaluate information and synthesize new sources into their existing knowledge Ultimately the feeling of knowing leads us toward new reflective and metacognitive tools that help meet this moment in the evolution of our information ecosystem This book explores the idea that knowing is a feeling that results from the interactions of the brain's unconscious and conscious processes and not through the accumulation of facts It's intended to help librarians educators and information scientists better understand what neuroscience and psychology are teaching about what it means to know and how our brain learns Outsiders Howard S. Becker, 1991 Refers specifically to marijuana smokers and dance band musicians **Why**
