has not yet been fully brought to bear on either human rights or the body Drawing on legal concepts and aspects of the law of human rights Mooney aims to provide a universally defensible set of human rights and a foundation or rather a frame for them She argues that the proper frames for human rights are firstly the human body seen as an index reliant on the natural world secondly the globe and finally language These three frames generate rights to food water sleep and shelter environmental protection and a right against dehumanization This book is essential reading for researchers and graduate students in the fields of human rights and semiotics of law

The Teacher's Body Diane P. Freedman, Martha Stoddard Holmes, 2012-02-01 These highly personal essays from a range of academic settings explore the palpable moments of discomfort disempowerment and or enlightenment that

emerge when we discard the fiction that the teacher has no body Visible and or invisible the body can transform both the teacher s experience and classroom dynamics When students think the teacher s body is clearly marked by ethnicity race disability size gender sexuality illness age pregnancy class linguistic and geographic origins or some combination of these both the mode and the content of education can change Other less visible aspects of a teacher s body such as depression or a history of sexual assault can have an equally powerful impact on how we teach and learn The collection anatomizes these moments of embodied pedagogy as unexpected teaching opportunities and examines their apparent impact on teacher student educational dynamics of power authority desire friendship open mindedness and resistance

Body Work Julia Coffey, 2016-03-10 The rise of the health beauty and fitness industries in recent years has led to an increased focus on the body Body image gender and health are issues of long standing concern in sociology and in youth studies but a theoretical

and empirical focus on the body has been largely missing from this field This book explores young people's understandings of their bodies in the context of gender and health ideals consumer culture individualisation and image Body Work examines the body in youth studies It explores paradoxical aspects of gendered body work practices highlighting the contradiction in men's increased participation in these industries as consumers alongside the re-emphasis of their gendered difference It explores the key ways in which the ideal body is currently achieved via muscularising practices slimming regimes and cosmetic procedures Coffey investigates the concept of health and how it is inextricably linked both to the bodily performance of gender ideals and an increased public emphasis on individual management and responsibility in the pursuit of a healthy body This book's conceptual framework places it at the forefront of theoretical work concerning bodies affect and images particularly in its development of Deleuzian research It will appeal to a wide range of scholars and students in fields of youth studies education sociology gender studies cultural studies affect and body studies

Violence, Visual Culture, and the Black Male Body Cassandra Jackson, 2011-04-13 From early photographs of disfigured slaves to contemporary representations of bullet-riddled rappers images of wounded black men have long permeated American culture While scholars have fittingly focused on the ever-present figure of the hypermasculine black male little consideration has been paid to the wounded black man as a persistent cultural figure This book considers images of wounded black men on various stages including early photography contemporary art hip hop and new media Focusing primarily on photographic images Jackson explores the wound as a specular moment that mediates power relations between seers and the seen Historically the representation of wounded black men has privileged the viewer in service of white supremacist thought At the same time contemporary artists have deployed the figure to expose and disrupt this very power paradigm Jackson suggests that the relationship between the viewer and the viewed is not so much static as fluid and that wounds serve as intricate negotiations of power structures that cannot always be simplified into the condensed narratives of victims and victimizers Overall Jackson attempts to address both the ways in which the wound has been exploited to patrol and contain black masculinity as well as the ways in which twentieth-century artists have represented the wound to disrupt its oppressive implications
