Equity-Based Career Development and Postsecondary Transitions Erik M. Hines, Laura Owen, 2022-03-01 Former First Lady Michelle Obama believes that every individual should have some type of postsecondary education or training beyond high school to achieve economic and personal success Reach Higher Initiative Better Make Room 2019 Educational attainment e g a high school diploma college degree or postsecondary training provides career opportunities for advancement into leadership positions and benefits such as health insurance and retirement Heckman 2000 Additionally an individual with a college degree can make over one million dollars more over a lifetime in salary than someone with a high school diploma Carnevale Cheah Hanson 2015 Acquiring a college degree can lead to employment opportunities and is considered an asset in the U S economy Washington 2010 However certain populations encounter barriers to attaining an education particularly a postsecondary education leading to a disparity in receiving the aforementioned benefits Some of these populations include African American students LGBTQ students and students with disabilities There is a dearth of information and research on providing guidance on implementation research and best practices in equity based career development college readiness and successful postsecondary transitions for minoritized at risk or vulnerable populations The editors of this volume invited authors with research and practice expertise around various student populations in preparing them for college and career readiness as well as postsecondary transitions This book is the first of its kind to discuss career development and postsecondary transitions from an access and equity perspective Further this text serves as a call to action to ensure the United States most vulnerable populations has an opportunity to successfully transition into multiple postsecondary options after high school *The National Curriculum Handbook for Secondary Teachers in England*, 2005-09-30 The National Curriculum handbooks are the official National Curriculum documents for secondary and primary schools They are the revised blue print for what every child will be required to learn in school from 2004 **Career Development as a Partner in Nation Building Australia** Wendy Patton, 2019-07-15 Despite examples of vocational guidance practice being evident in Australia since the mid 1800s there remains a spasmodic and patchwork approach to practice across the country For decades it is a field which has been paradoxically boosted and challenged by changing economic and political agendas Repeated international national and State reviews emphasise the vital nature of a systemic national approach to career development however authors repeatedly lament the lack of a sustained focus on career activity

as a major national priority There is no broad comprehensive historical reckoning of the history of career development theory and practice in Australia since this early period Career development theory and practice in Australia has been forged in partnership with developments in an international context In documenting the shared history with other countries the author significantly adds to the body of knowledge on career development as a field in Australia and internationally The book provides new understandings about the historical development of this field of knowledge and in particular the challenging and cyclical nature of its policy history      Career Education: Implications for Minorities United States.
