Search for Sterile Neutrinos with the MINOS Long-Baseline Experiment Ashley Michael Timmons, 2017-08-10 This thesis highlights data from MINOS a long baseline accelerator neutrino experiment and details one of the most sensitive searches for the sterile neutrino ever made Further it presents a new analysis paradigm to enable this measurement and a comprehensive study of the myriad systematic uncertainties involved in a search for a few percent effect while also rigorously investigating the statistical interpretation of the findings in the context of a sterile neutrino model Among the scientific community this analysis was quickly recognized as a foundational measurement in light of which all previous evidence for the sterile neutrino must now be re interpreted The existence of sterile neutrinos has long been one of the key questions in the field Not only are they a central component in many theories of new physics but a number of past experiments have yielded results consistent with their existence Nonetheless they remain controversial the interpretation of the data showing evidence for these sterile neutrinos is hotly debated
