Looking for the Aliens Peter A. Hough, Jenny Randles, 1997 The Alien Abduction Phenomenon Paul Meehan, 2025-06-13 News reports books articles and films about alien abductions have long captured the public imagination This book traces the evolution of the phenomenon from the late 1940s flying saucer era and the contactee and occupant sightings of the 1950s to the widespread abduction stories of the 1960s and beyond It examines how broader social cultural and scientific contexts have shaped these accounts and offers a critical analysis of their interpretations over time Also discussed are the key researchers who have sought to understand the nature and intentions of alleged extraterrestrial beings or ufonauts while addressing the skepticism about the subject The efforts of the scientific community to investigate unidentified aerial phenomenon UAP and abductions are assessed acknowledging both the challenges and limitations of such inquiries Firsthand encounters with non human entities are examined attempting to uncover the forces behind these sightings and arguing that there could be unforeseen consequences of ignoring the phenomena **They Would Be Gods** Anthony K. Forwood, 2011 Centering the Margins of Anthropology's History Regna Darnell, Frederic W. Gleach, 2021-05 The series Histories of Anthropology Annual presents diverse perspectives on the discipline's history within a global context with a goal of increasing the awareness and use of historical approaches in teaching learning and conducting anthropology The series includes critical comparative analytical and narrative studies involving all aspects and subfields of anthropology Volume 14 Centering the Margins of Anthropology's History focuses on the conscious recognition of margins and suggests it is time to bring the margins to the center both in terms of a changing theoretical openness and a supporting body of scholarship if not to problematize the very dichotomy of center and margins itself The essays explore two major themes of anthropology's margins First anthropologists and historians have long sought out marginalized and forgotten ancestors arguing for their present day relevance and offering explanations for the lack of attention to their contributions to theory analysis methods and findings Second anthropologists and their historians have explored a range of genres to present their results in provocative and open ended formats This volume closes with an experimental essay that offers a dynamic multifaceted perspective that captures one of the dominant if sometimes marginalized voices in history of anthropology Steven O Murray's career developed at the institutional margins of several academic disciplines and activist discourses but his distinctive voice has been and will remain at the center of our history *UFOs* Robert C. Trundle, 2000 *After Contact* Albert A. Harrison, 1997-08-21 Examines in detail the psychological sociological political and cultural dimensions of the search for extraterrestrial intelligence **The Encyclopedia of Alien Encounters** Alan Baker, 1999 Containing over 500 entries this historical reference work provides an A Z of alien and non human encounters It details the events encounters personalities and theories that have created this field of human experience and inquiry **High Strangeness** Jerome Clark, 1996 **Saucer Movies** Paul Meehan, 1998 The first book to examine the relationship between cinema and the UFO

Digging Holes in Popular Culture Miles Russell, 2002 What would Howard Carter have thought of Lara Croft and why do archaeologists feature so prominently in Star Trek Douglas Adams author of Hitchhiker's Guide to the Galaxy writes the preface to this unusual collection of papers dedicated to exploring the role of the archaeologist in popular culture The clichés and stereotypes of archaeology that abound in popular culture the sense of mystery and adventure the excitement generated by a dangerous treasure hunt or a thrilling detective story rarely hint at the monotonous hours spent by modern archaeologists researching in laboratories and libraries and filling out paperwork Yet the role models provided by fictional characters such as Dr Who Indiana Jones Captain Jean Luc Picard and Lara Croft have had a powerful influence on how archaeologists and the practices of archaeology are viewed by the general public At times hilarious these papers nevertheless address serious cultural issues relevant to archaeology today colonialism the indigenous voice gender roles objectivity and ownership of the past

Science, Culture and the Search for Life on Other Worlds John W. Traphagan, 2016-08-26 This book explores humanity's thoughts and ideas about extraterrestrial life paying close attention to the ways science and culture interact with one another to create a context of imagination and discovery related to life on other worlds Despite the recent explosion in our knowledge of other planets and the seeming era of discovery in which we live to date we have found no concrete evidence that we are not alone Our thinking about life on other worlds has been and remains the product of a combination of scientific investigation and human imagination shaped by cultural values particularly values of exploration and discovery connected to American society The rapid growth in our awareness of other worlds makes this a crucial moment to think about and assess the influence of cultural values on the scientific search for extraterrestrial life Here the author considers the junction of science and culture with a focus on two main themes 1 the underlying assumptions many of which are tacitly based upon cultural values common in American society that have shaped the ways researchers in astrobiology and SETI have conceptualized the nature of their endeavor and represented ideas about the

potential influence contact might have on human civilization and 2 the empirical evidence we can access as a way of thinking about the social impact that contact with alien intelligence might have for humanity

Your Creative Brain Shelley Carson, 2012-09-19 Research based techniques that show everyone how to expand creativity and increase productivity

Harvard psychologist Shelley Carson's provocative book published in partnership with Harvard Health Publications reveals why creativity isn't something only scientists, investors, artists, writers, and musicians enjoy; in fact, all of us use our creative brains every day at home, work, and play. Each of us has the ability to increase our mental functioning and creativity by learning to move flexibly among several brain states. Explains seven brain states or brainsets and their functions as related to creativity, productivity, and innovation. Provides quizzes, exercises, and self-tests to activate each of these seven brainsets to unlock our maximum creativity. Your Creative Brain, called by critics a new classic in the field of creativity, offers inspiring suggestions that can be applied in both one's personal and professional life

The Oxford Handbook of the Development of Imagination Marjorie Taylor, 2013-04-02 Children are widely celebrated for their imaginations, but developmental research on this topic has often been fragmented or narrowly focused on fantasy. However, there is growing appreciation for the role that imagination plays in cognitive and emotional development, as well as its link with children's understanding of the real world. With their imaginations, children mentally transcend time, place, and/or circumstance to think about what might have been, plan and anticipate the future, create fictional relationships and worlds, and consider alternatives to the actual experiences of their lives. The Oxford Handbook of the Development of Imagination provides a comprehensive overview of this broad new perspective by bringing together leading researchers whose findings are moving the study of imagination from the margins of mainstream psychology to a central role in current efforts to understand human thought. The topics covered include fantasy, reality distinctions, pretend play, magical thinking, narrative, anthropomorphism, counterfactual reasoning, mental time travel, creativity, paracosms, imaginary companions, imagination in non-human animals, the evolution of imagination, autism, dissociation, and the capacity to derive real-life resilience from imaginative experiences. Many of the chapters include discussions of the educational, clinical, and legal implications of the research findings, and special attention is given to suggestions for future research

Psychology Serving Humanity: Proceedings of the 30th International Congress of Psychology Saths Cooper, Kopano Ratele, 2014-06-27 This is the second of two volumes collecting the key proceedings of the 30th International Congress of Psychology, the first to be held in Africa in the 123 years of its history. The theme of the conference was Psychology Serving Humanity, a recognition of psychology's unfulfilled mission in the majority world and a reflection of what that world requires from psychology. Mainstream Psychology finds its largest number of exponents and leading personalities in the high-income countries of the global West. The Other Psychologies, referred to by different names, are scattered across the rest of the world. Some of the names of these other forms of Psychology include indigenous

Psychology The main driver of indigenous and other forms of non mainstream Psychology is the endeavour to embed the discipline in the dynamics of local societies Psychology has entered an interesting era however While the dominant philosophy underpinning the discipline remains Western Psychology in the majority world in 2000s may have reached a tipping point It took over a hundred years but the 2004 and 2012 International Congresses of Psychology held in China and South Africa heralded a newfound possibility for the discipline There is an opening of the field to potentially new thought and forms of the practice of Psychology These proceedings are published in the hope that all psychologists especially those located in well resourced institutions in the West confront the divided reality that characterizes Psychology so as to creatively consider the opportunity opened up by the growing field at the peripheries Care was taken when assembling both conference and proceedings to ensure that the entire international psychological community was represented Volume One contains contributions to Majority World Psychology Volume Two contains contributions to Western Psychology The Writers Directory ,2013 The UFO Invasion Kendrick Frazier,Barry Karr,Joe Nickell,2023-10-17 UFOs and space aliens are visiting Earth Now it s time to get the facts Did a flying saucer really crash near Roswell New Mexico in 1947 and have we been victims of a sinister government conspiracy to hide its alien occupants in a secret facility Is there truth behind the swirled crops phenomenon Have humans been abducted by aliens In an effort to counter media misinformation The UFO Invasion offers definitive behind the scenes accounts of each case of extraterrestrial visitations and paranormal claims This fully documented look at sightings encounters the Roswell incident MJ 12 documents crop circles the alien autopsy and more will challenge illuminate anger and amuse Included are revealing articles by Robert A Baker Robert E Bartholomew Joseph A Bauer William B Blake Robyn M Dawes C Eugene Emery Zen Faulkes John F Fischer Kingston A George Jr Philip J Klass Joe Nickell James E Oberg Peter J Reeve Ian Ridpath Robert Sheaffer Armando Simon Lloyd Stires Trey Stokes Dave Thomas Richard L Weaver Col USAF Jeff Wells and Robert P Young Also SETI coordinator Thomas P McDonough ponders searching for extraterrestrial intelligence **21st Century Psychology: A Reference Handbook** Stephen F.
