Moran, 2014-07-14 This study deals with a topic of increasing concern the relations between multinational corporations and their host countries in the Third World Theodore H Moran describes how a reaction against dependencia a realization that the fate of the nation hinges on the decisions made by uncontrollable outside forces can spur a host country to opt for control of an industry exposing the country to new dangers as well as new opportunities Originally published in 1975 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Patterns of Development in Latin America John Sheahan, 2021-04-13 In this major work an economist with long experience as an advisor in developing countries explores the conflict between market forces and political reform that has led straight into Latin America's most serious problems John Sheahan addresses three central concerns the persistence of poverty in Latin American countries despite rising national incomes the connection between economic troubles and political repression and the relationships between Latin America and the rest of the world in trade and finance as well as overall dependence His comprehensive explanation of why many Latin Americans identify open political systems with frustration and economic breakdown will interest not only economists but also a broad range of other social scientists This is political economy in the classical sense of the word establishing a clear connection between the political and economic realities of Latin America

Latin American University Students Arthur Liebman, Kenneth N. Dom nguez, 2009-06-01 The twentieth century history of Cuba borders on fantasy This diminutive country boldly and repeatedly exercises the foreign policy of a major power Although closely tied to the United States through most of its modern history Cuba successfully defied the U S government after 1959 consolidated its own power and defeated an invasion of U S backed exiles at the Bay of Pigs in 1961 Fidel Castro then brought the world alarmingly close to nuclear war in 1962 Jorge Dom nguez presents a comprehensive survey of Cuban international relations since Castro came to power Dom nguez unravels Cuba s response to the 1962 missile crisis and the U S Soviet understandings that emerged from that He explores the ties that link Cuba to the U S S R and other Communist countries analyzes Cuban support for revolutionary movements throughout the world especially in Latin America and Africa and assesses the significance of Cuban political and economic relations with Western Europe Canada and Japan Some have charged that Cuba does not have a foreign policy that Fidel Castro merely takes orders from his Soviet bosses Dom nguez argues that there is indeed a specifically Cuban foreign policy poised not only between hegemony and autonomy between compliance and self assertion but also between militancy and pragmatism He believes that within the context of Soviet hegemony Cuba s foreign policy is very much its own and he marshals impressive evidence to support this belief His book is based on extensive documentation from Cuba the United States and other countries as well as from many in depth interviews carried out during trips to Cuba European and

Non-European Societies, 1450-1800 Robert Forster, 2019-07-16 First published in 1997 this is the first of two volumes It looks at the process of European expansion which brought into contact societies and cultures across the world which had been initially alien to one another Conflict and violent conflict was one aspect of this interaction but accommodation mutual adaptation and institutional and behavioural synthesis were also present though often biased in favour of European norms The intent of this book is to avoid treating colonization dominance and exploitation as the only focuses of attention In the first volume Robert Forster explores issues of formative influences the impact of Eurocentrism on historiography and the reaction against it and the differing approaches and perceptions of the Europeans notably the Spanish French and English In this period he distinguishes three modes of interaction that of the trading empires generally in Africa and Asia where the European control of the encounter was slighter and those of the regions of settlement as in North America and of exploitation typified by the Caribbean where the European impact was profound The second volume focuses on the Americas and uses the topics of religion class gender and race as its points of entry **Markets, Myths, and Middlemen** Gregory J. Scott, 1985

Access to Power Joan M. Nelson, 2017-03-14 Joan Nelson elucidates the implications of this rapid growth and concomitant poverty for politics Unlike many scholars who have sought an all encompassing theory to explain the political behavior of the urban poor Professor Nelson emphasizes the complex variety in the economic social and political circumstances that influence this behavior Originally published in 1979 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Soviet Bloc, Unity and Conflict Zbigniew Brzezinski, 1967 This is the first full length study of relations among the communist states The study explores the implications of the status of Yugoslavia and China the significance of the Hungarian revolution and the position of Poland in the Soviet bloc and clarifies the Khrushchev Gomulka clash of 1956 and the complex role of Tito Zbigniew Brzezinski emphasizes the role of ideology and power in the relations among the communist states contrasting bloc relations and the unifying role of Soviet power under Stalin with the present situation He suggests that conflicts of interest among the ruling elites will result either in ideological disputes or in weakening the central core of the ideology leading to a gradual decline of unity among the Communist states The author while on leave from his post as Professor and Director of the Research Institute on Communist Affairs Columbia University and serving on the U S State Department s Policy Planning Council has revised and updated his important study and added

three new chapters on more recent developments He gives particular attention to the Sino Soviet dispute **Boletín de Estudios Latinoamericanos Y Del Caribe** ,1976 *Energy and Structure* Richard Newbold Adams,2014-02-19 All social structures are essentially power structures dependent on energy The concept of power and the role of energy in social organization are crucial and timely concerns especially in light of the current apprehension about future energy resources In *Energy and Structure* Richard N Adams argues that social power affects humanity s approach to ecological economic and political problems directing people to seek solutions that are often deceptively shortsighted Adams an anthropologist proposes that social power is directly derived from control over energy processes He identifies how power and mentalistic structures constitute fundamental determinants that shape the lives of people at all stages of cultural development forcing them to accept alternatives often far removed from their desires His central thesis is that the amount of power in any system varies with the amount of control exercised over the environment and that increasing power and control lead to increasing centralization of decision making social marginalization and environmental despoliation Thus the more highly developed societies by virtue of their greater controls are responsible for the greater ultimate subordination and destruction of human potential as humanity combines technological advances with a growing inability to exercise good judgment with respect to our own survival *Energy and Structure* begins with an examination of the basic theory of social power what it is and how it works Adams defines and differentiates between the concepts of power and control authority and legitimacy power domains and levels He then examines the underlying metatheory of energetic and mentalistic structures and provides an analytic model of the evolution of power from the primitive band to modern nations He predicts the emergence of supranational blocs and discusses other future possibilities Throughout his theoretical points are solidly supported by examples drawn from a wide range of cultures **Book Review Index to Social Science Periodicals** Paul Guenther,Arnold M.
