Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl Avery Library,1990 *The Architecture of Modern Italy* Terry Kirk,2005-06-02 Modern Italy may sound like an oxymoron For Western civilization Italian culture represents the classical past and the continuity of canonical tradition while modernity is understood in contrary terms of rupture and rapid innovation Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting The ancient forum medieval cloisters baroque piazzas and papal palaces constitute our ideal itinerary of Italian civilization The Campo of Siena Saint Peter's all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations As seasonal tourist or seasoned historian we edit the encroachments time and change have wrought on our image of Italy The learning of history is always a complex task one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years Culture on the peninsula continues to evolve with characteristic vibrancy Italy is not a museum To think of it as such as a disorganized yet phenomenally rich museum unchanging in its exhibits is to misunderstand the nature of the Italian cultural condition and the writing of history itself **Analogical Thinking in Architecture** Jean-Pierre Chupin,2023-07-27 This book provides an in

depth exploration of the rich and persistent use of analogical thinking in the built environment Since the turn of the 21st century design thinking has permeated many fields outside of the design disciplines It is expected to succeed whenever disciplinary boundaries need to be transcended in order to think outside the box This book argues that these qualities have long been supported by analogical thinking an agile way of reasoning in which think the unknown through the familiar The book is organized into four case studies the first reviews analogical models that have been at the heart of design thinking representations from the 1960s to the present day the second investigates the staying power of biological analogies the third explores the paradoxical imaginary of analogous cities as a means of integrating contemporary architecture with heritage contexts while the fourth unpacks the critical and theoretical potential of linguistic metaphors and visual comparisons in architectural discourse Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present the book shows how the analogical world of the project is revealed as a wide open field of creative and cognitive interactions These visual and textual operations are explained through 36 analogical plates which can be read as an inter text demonstrating how analogy has the power to reconcile design and theories

Gunnar Asplund's Gothenburg Nicholas Adams, 2015-01-14 In the west coast port city of Gothenburg Sweden the architect Gunnar Asplund built a modest extension to an old courthouse on the main square 1934-36 Judged today to be one of the finest works of modern architecture the courthouse extension was immediately the object of a negative newspaper campaign led by one of the most noted editors of the day Torgny Segerstedt Famous for his determined opposition to National Socialism he also took a principled stand against the undermining of urban tradition in Gothenburg Gothenburg's problems with modern public architecture though clamorous and publicized throughout Sweden were by no means unique In Gunnar Asplund's Gothenburg Nicholas Adams places Asplund's building in the wider context of public architecture between the wars setting the originality and sensitivity of Asplund's conception against the political and architectural struggles of the 1930s Today looking at the building in the broadest of contexts we can appreciate the richness of this exquisite work of architecture This book recaptures the complex magic of its creation and the fascinating controversy of its completed form

Object to Be Destroyed Pamela M. Lee, 2001-08-24 In this first critical account of Matta Clark's work Pamela M Lee considers it in the context of the art of the 1970s particularly site specific conceptual and minimalist practices and its confrontation with issues of community property the alienation of urban space the right to the city and the ideologies of progress that have defined modern building programs Although highly regarded during his short life and honored by artists and architects today the American artist Gordon Matta Clark 1943-78 has been largely ignored within the history of art Matta Clark is best remembered for site specific projects known as building cuts Sculptural transformations of architecture produced through direct cuts into buildings scheduled for demolition these works now exist only as sculptural fragments photographs and film and video documentations Matta Clark is also remembered as a catalytic force in the creation of SoHo in the early 1970s Through loft activities site projects at the exhibition space 112 Greene Street and his work at the restaurant Food he participated in the production of a new social and artistic space Have art historians written so little about Matta Clark's work because of its ephemerality or as Pamela M Lee argues because of its historiographic political and social dimensions What did the activity of carving up a building in anticipation of its destruction suggest about the conditions of art making architecture and urbanism in the 1970s What was one to make of the paradox attendant on its making that the production of the object was contingent upon its ruination How do these projects address the very writing of history a history that imagines itself building toward an ideal work in the service of progress In this first critical account of Matta Clark's work Lee considers it in the context of the art of the 1970s particularly site specific conceptual and minimalist practices and its

confrontation with issues of community property the alienation of urban space the right to the city and the ideologies of progress that have defined modern building programs Anti-Veiling Campaigns in the Muslim World Stephanie Cronin,2014-04-24 In recent years bitter controversies have erupted across Europe and the Middle East about women s veiling and especially their wearing of the face veil or niqab Yet the deeper issues contained within these controversies secularism versus religious belief individual freedom versus social or family coercion identity versus integration are not new but are strikingly prefigured by earlier conflicts This book examines the state sponsored anti veiling campaigns which swept across wide swathes of the Muslim world in the interwar period especially in Turkey and the Balkans Iran Afghanistan and the Soviet republics of the Caucasus and Central Asia It shows how veiling was officially discouraged and ridiculed as backward and although it was rarely banned veiling was politicized and turned into a rallying point for a wider opposition Asking a number of questions about this earlier anti veiling discourse and the policies flowing from it and the reactions which it provoked the book illuminates and contextualizes contemporary debates about gender Islam and modernism Historic Cities Jeff Cody,Francesco Siravo,2019-07-30 This new volume in the GCI s Readings in Conservation series brings together a selection of seminal writings on the conservation of historic cities This book the eighth in the Getty Conservation Institute s Readings in Conservation series fills a significant gap in the published literature on urban conservation This topic is distinct from both heritage conservation and urban planning despite the recent growth of urbanism worldwide no single volume has presented a comprehensive selection of these important writings until now This anthology profusely illustrated throughout is organized into eight parts covering such subjects as geographic diversity reactions to the transformation of traditional cities reading the historic city the search for contextual continuities the search for values and the challenges of sustainability With more than sixty five texts ranging from early polemics by Victor Hugo and John Ruskin to a generous selection of recent scholarship this book thoroughly addresses regions around the globe Each reading is introduced by short prefatory remarks explaining the rationale for its selection and the principal matters covered The book will serve as an easy reference for administrators professionals teachers and students faced with the day to day challenges confronting the historic city under siege by rampant development Maritime Operations Law in Practice David Letts,Rob McLaughlin,2022-12-09 The law that applies to maritime operations at sea is complex and comprises two distinct elements treaty law 1982 United Nations Convention on the Law of the Sea and the cases and incidents that occur at sea in both peacetime and during armed conflict which result in the creation of customary international law applicable to maritime operations at sea Covering sovereignty and vessel status jurisdiction and interdiction freedom of navigation maritime law enforcement and security and the law of naval warfare this edited collection brings together the most famous and influential cases and incidents at sea Exploring the entire spectrum of maritime operations from high end war fighting to constabulary operations that are conducted by naval forces and maritime law enforcement agencies at sea to provide the factual circumstances of each case or incident offering

Constructing Gardens, Cultivating the City Amanda Shoaf Vincent, 2023-05-16 Constructing Gardens Cultivating the City is the first cultural history of major new parks developed in Paris in the late twentieth century as part of the city's program of adaptive reuse of industrial spaces Thanks to laws that gave the city more political autonomy Paris's local government launched a campaign of park creation in the late 1970s that continued to the turn of the millennium The parks in this book represent this campaign and illustrate different facets of their cultural and historical context Archival research interviews and analyses of the parks reveal how postmodern debates about urban planning the historic city public space and nature's presence in an urban setting influenced their designs In sum the city adopted the garden as a model for public parks investing in complex richly symbolic and representational spaces These parks were intended to represent contemporary twists on traditional designs and serve local residents as much as they would contribute to Paris's role as a world city The parks development process often included points of conflict pointing to differing views on what Parisian space should represent and fundamental contradictions between the characteristics of public space and the garden as it is traditionally defined These parks demonstrate the ongoing cultivation of the city over time in which transformed sites not only fulfil new functions but also engage with history and their surroundings to create new meaning They stand for landscape as a form of signifying cultural production that directly engages with other art forms and ways of knowing Just as the Luxembourg Gardens the Tuileries and the Buttes Chaumont parks exemplify their eras cultural dynamics such parks as the Jardin Atlantique Parc Andr Citro n and the Jardin des Halles express contemporary French culture within the archetypal space of

their era the city Finally they point the way to current trends in landscape architecture such as citizen gardening and ecological initiatives
