Louisiana In Perspective 2005:

Student Displacement in Louisiana After the Hurricanes of 2005 John F. Pane, 2006 Hurricane Katrina was the most costly and devastating natural disaster in U S history It and Hurricane Rita combined left the Gulf region with tremendous challenges for recovery and the need to rebuild infrastructure and reestablish services This report focuses on the displacement of approximately 200 000 public school students in Louisiana To help guide educators and policymakers in their ongoing responses to this disaster and in their preparations for future events this technical report documents many of the short term effects of the movements of students caused by the storms Focusing on the Louisiana public school system it explores the experiences of displaced students during the first academic year following the hurricanes their movements among schools the durations of enrollments at each site time out of school and the number and characteristics of students fitting each of four patterns of movement It also reports on the effects of the displacement on schools and their students and policies adopted in response to serving displaced students Using Louisiana s student data system we obtained information about all students in the state who entered or exited a public school at any time during the 2005 06 school year because of the hurricanes and we surveyed principals from a stratified sample of schools serving displaced students statewide The student displacement due to Hurricanes Katrina and Rita persisted throughout the entire 2005 06 school year 55 percent of the displaced students ended the school year outside their original schools The students who remained displaced were disproportionately minority students and students who had been achieving poorly prior to the storms But even among those students who have returned to their original schools a substantial amount of schooling was lost and the effects of the storms linger Principals reported that displaced students both those who have returned to their original schools and those who have enrolled elsewhere in the state exhibited several common symptoms of trauma In some schools the displaced students were more likely than others to engage in fighting arguing bullying eating or playing in isolation and violating school rules they were less likely to engage in school clubs activities social events or sports teams Principals also frequently reported that displaced students were more likely than preexisting students to need mental health counseling Schools throughout the state and the nation will continue to be called on to serve displaced students and it is imperative that they obtain the resources they need to serve them well Policies and resources to help teachers manage their own hurricane related problems and mental health needs might ultimately improve the services teachers provide to students Finally education officials at both the state and local levels would benefit from better access to complete and accurate student records and a national system to coordinate two way sharing of student information across state boundaries **Environmental Health Perspectives**

,2004-07 *New Perspectives on State Government Fiscal Challenges* John Merrifield, Barry W. Poulson, 2023-07-03 In this book on new fiscal approaches nineteen experts examine topics ranging from constitutional reform and debt fatigue to fiscal rules and zero based budgeting Together these contributions inform a multifaceted nuanced argument for the need to

formalize spending restraint and redefine state debt to include unfunded liabilities Scholars will find the book useful as a reference tool explaining how rules based fiscal policy is used to address debt fatigue and unsustainable spending growth Legislators and practitioners will find the book useful as a reference source in designing and simulating second generation fiscal rules and educators will find the book helpful for its close analysis of policies in representative states such as Illinois New York New Jersey Nebraska and California Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2008 United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Labor, Health and Human Services, Education, and Related Agencies,2007 **Handbook of public health in natural disasters** Ronald Ross Watson,Joseph A. Tabor,John E. Ehiri,Victor R. Preedy,2023-08-07 The combination of growing populations moving into large cities in high risk zones increase the risk of natural disasters with a substantial public health consequence A high population density and rapid air travel increase the spread and effects of plagues and diseases People in countries with limited resources are more vulnerable to death and other consequences of disasters This requires global rather than national preparedness and response strategies Public health organisations government and non government organisations can take a leadership role and provide training organisation and research knowledge to improve responses to such disasters This book is the first holistic public health approach in relation to natural disasters It fills the gap to have a one stop shopping synopsis of key ideas associated with mediation of public health natural disasters It is unique in focusing on lessons learned rather than what to do Published research relating to general responses by public health agencies to disasters is scientifically evaluated Various types of disasters are reviewed flooding diseases earthquakes volcanoes and drought Long term needs prevention and individual preparation are taken into account The information can be used to prepare and mitigate effects of disasters The summary points at the start of each chapter will help the reader to use as this book as reference book and for educational purpose *Perspectives on the Restoration of the Mississippi Delta* John W. Day,G. Paul Kemp,Angelina M. Freeman,David P. Muth,2014-05-16 Human impacts and emerging mega trends such as climate change and energy scarcity will impact natural resource management in this century This is especially true for deltas because of their ecological and economic importance and their sensitivity to climate change The Mississippi delta is one of the largest in the world and has been strongly impacted by human activities Currently there is an ambitious plan for restoration of the delta This book by a renown group of delta experts provides an overview of the challenges facing the delta and charts a way forward to sustainable management **Tulane Law Review** ,1993 **Gods of the Mississippi** Michael Pasquier,2013-02-27 From the colonial period to the present the Mississippi River has impacted religious communities from Minnesota to the Gulf of Mexico Exploring the religious landscape along the 2 530 miles of the largest river system in North America the essays in Gods of the Mississippi make a compelling case for American religion in motion not just from east to west but also from north to south With discussion of topics such as the religions of the Black

Atlantic religion and empire antebellum religious movements the Mormons at Nauvoo black religion in the delta Catholicism in the Deep South and Johnny Cash and religion this volume contributes to a richer understanding of this diverse dynamic and fluid religious world **New Orleans in the Atlantic World** William Boelhower, 2013-09-13 The thematic project New Orleans in the Atlantic World was planned immediately after hurricane Katrina and focuses on what meteorologists have always known the city's identity and destiny belong to the broader Caribbean and Atlantic worlds as perhaps no other American city does Balanced precariously between land and sea the city's geohistory has always interwoven diverse cultures languages peoples and economies Only with the rise of the new Atlantic Studies matrix however have scholars been able to fully appreciate this complex history from a multi disciplinary multilingual and multi scaled perspectivism In this book historians geographers anthropologists and cultural studies scholars bring to light the atlanticist vocation of New Orleans and in doing so they also help to define the new field of Atlantic Studies This book was published as a special issue of Atlantic Studies **Houston Business and Tax Law Journal** ,2006
