James D. Fox, 2013-02-05 A pilot retires after 38 years from the world's largest oil company. He accepts a job in another country halfway around the world. His experience flying the cream of business jets is just what his new employer is looking for. He finds it necessary to adapt to his new environment and new associates. The new employer is General Arab Medical Service, who supplies workers for the Saudi Arabian Military service. The job entails flying not only high ranking military medical evacuation but also members of the Royal Family. The missions are with a mixed crew of copilots, nurses, hostesses, doctors, and engineers. Their nationalities are from all over the world. You need to know that in aviation the world language is English. The mixup due to language difficulties are mostly humorous but in at least one case almost deadly. A young man from Texas can be surprised from what he finds; the people and customs are in New York on his first visit. A young man from New York can find the people and customs in Texas as surprising. A friend and I were standing on a sidewalk looking in a show window in Wichita Falls, Texas, when a lady got out of her car and approached us. Young man, can I ask you a question? Why yes, Mam, what is it? She pointed at my feet. Don't those things hurt your feet? She was asking about the boots I was wearing. Why no, Mam, they don't. She turned with a look of not understanding and went back to her car, which I noticed was wearing Ohio license plates. That was in 1942 and I still remember what my friend and I talked about later. You reckon that lady never saw cowboy boots before? I don't know. Maybe she never saw a horse before. So many years later the same fellow sees people and customs that are completely strange. They speak English and eat with a knife and fork, most do, and they want to imitate the western world very much. Of course I'm speaking of those that I came in personal contact with. As a reader, you must remember their country was only born in 1932. It had no means of entering seriously into world commerce until oil was discovered. Then suddenly they as a country became very rich almost overnight. The King made decisions without the help of a Legislature. So he decided where the money went. The Royal Family got an early cut, and infrastructure was on the early list as well. If there was a need for a road, he just told some contractor to build the road. And make it out of concrete. That asphalt stuff just melts and runs away over here in the desert. Well, if you have roads, then you need cars, so the King calls Japan and says, Send me over a boatload of those little pickups you make. Well, ok, your Highness. What color do you want? I don't know, just mix them up. Ok. The Japanese boat arrived and the King tried to give them to the Bedouins from the desert. The nomads only accepted the white ones; all other colors were sent back to Japan. Everyone knows that dark colors are no good in the heat. Do you find that humorous? Well, I do. But what do you expect? A tall apartment building in downtown Riyadh is standing empty on the day of my arrival and on the day of my departure. The King had it built for the Bedouins to use for free. The occasion of celebrating the gift from the King, the Bedouins asked, Where do we put our camels and goats? Well, you won't need them here. The gift was rejected straight away, as the Brits say. Do you find that interesting? Well, I do. How about this? I asked one of my Saudi copilots, What is your goal? What do you mean? I mean, what are you working for? What do you hope for in the future? Oh, I

see what you mean Well I m saving my money to buy a camel and move out on the desert You mean you would leave your job in aviation living in a house with indoor plumbing electricity and air conditioning to move into a tent in the desert Sure what s wrong with that Well the time

Making the Modern American Fiscal State Ajay K. Mehrotra,2013-09-30 At the turn of the twentieth century the US system of public finance underwent a dramatic transformation The late nineteenth century regime of indirect hidden partisan and regressive taxes was eclipsed in the early twentieth century by a direct transparent professionally administered and progressive tax system This book uncovers the contested roots and paradoxical consequences of this fundamental shift in American tax law and policy It argues that the move toward a regime of direct and graduated taxation marked the emergence of a new fiscal polity a new form of statecraft that was guided not simply by the functional need for
