Machines For Feeling:

Machines Abraham P. DeLeon, 2015-01-01 This book is about machines those that have been actualized fantastical imaginal machines to those deployed as metaphorical devices to describe complex social processes Machines argues that they transcend time and space to emerge through a variety of spaces and places times and histories and representations They are such an integral fabric of daily reality that their disappearance would have immediate and dire consequences for the survival of humanity They are part and parcel to our contemporary social order From labor to social theory art or consciousness literature or television to the asylums of the 19th century machines are a central figure an outgrowth of affective desire that seeks to transcend organic limitations of bodies that whither age and die Machines takes the reader on an intellectual artistic and theoretical journey weaving an interdisciplinary tale of their emergence across social cultural and artistic boundaries With the deep engagement of various texts Machines offers the reader moments of escape alternative ways to envision technology for a future yet to materialize Machines rejects the notion that technological innovations are indeed neutral propelling us to think differently about those things created under specific economic or historical paradigms Rethinking machines provides a rupture to our current technocratic impetus shining a critical light on possible alternatives to our current reality Let us sit back and take a journey through Machines holding mechanical parts as guides to possible alternative futures

Feeling Mediated

Brenton J. Malin, 2014 New technologies whether text message or telegraph inevitably raise questions about emotion New forms of communication bring with them both fear and hope on one hand allowing us deeper emotional connections and the ability to forge global communities while on the other prompting anxieties about isolation and over stimulation a Feeling Mediated investigates the larger context of such concerns considering both how media technologies intersect with our emotional lives and how our ideas about these intersections influence how we think about and experience emotion and technology themselves Drawing on extensive archival research Brenton J Malin explores the historical roots of much of our recent understanding of mediated feelings showing how earlier ideas about the telegraph phonograph radio motion pictures and other once new technologies continue to inform our contemporary thinking With insightful analysis a Feeling Mediated explores a series of fascinating arguments about technology and emotion that became especially heated during the early 20th century These debates which carried forward and transformed earlier discussions of technology and emotion culminated in a set of ideas that became institutionalized in the structures of American media production advertising social research and policy leaving a lasting impact on our everyday lives
