Speculations of War Annette M. Magid, 2021-02-15 Late 19th century science fiction stories and utopian treatises related to morals and attitudes often focused on economic sociological and at times Marxist ideas More than a century later science fiction commonly depicts the inherent dangers of capitalism and imperialism Examining a variety of conflicts from the Civil War through the post 9 11 era this collection of new essays explores philosophical introspection and futuristic forecasting in science fiction fantasy utopian literature and film with a focus on the warlike nature of humanity *Monsters in the Machine* Steffen Hantke, 2016-06-20 During the 1950s and early 1960s the American film industry produced a distinct cycle of films situated on the boundary between horror and science fiction Using the familiar imagery of science fiction from alien invasions to biological mutation and space travel the vast majority of these films subscribed to the effects and aesthetics of horror film anticipating the dystopian turn of many science fiction films to come Departing from projections of American technological awe and optimism these films often evinced paranoia unease fear shock and disgust Not only did these movies address technophobia and its psychological social and cultural corollaries they also returned persistently to the military as a source of character setting and conflict Commensurate with a state of perpetual mobilization the US military comes across as an inescapable presence in American life Regardless of their genre Steffen Hantke argues that these films have long been understood as allegories of the Cold War They register anxieties about two major issues of the time atomic technologies especially the testing and use of nuclear weapons as well as communist aggression and or subversion Setting out to question expand and correct this critical argument Hantke follows shifts and adjustments prompted by recent scholarly work into the technological political and social history of America in the 1950s Based on this revised historical understanding science fiction films appear in a new light as they reflect on the troubled memories of World War II the emergence of the military industrial complex the postwar rewriting of the American landscape and the relative insignificance of catastrophic nuclear war compared to America's involvement in postcolonial conflicts around the globe

Winged Warfare Michael Paris, 1992 This original study provides a significant reinterpretation of the development of air power in Britain highlighting how in the period before 1914 aerial warfare was already becoming an increasingly forceful concept

The War of the Twins Krishna Chandra Sagar, 1997 This is perhaps the world's first war book in which the author has not used the word enemy anywhere in the text and he has his own reasons for this The two combatant countries India and Pakistan whose war events are subject matter of this work should never be enemy of each other because they are not only the brothers but also the twins born at the same time and are inseparably linked by the geography of the sub continent

The Principles of War Historically Illustrated

Edward Altham Altham,1914 **Emergency War Plan** Sean M. Maloney,2021-02 2023 AFHF Air Power History Book Prize Winner *Emergency War Plan* examines the theory and practice of American nuclear deterrence and its evolution during the Cold War Previous examinations of nuclear strategy during this time have for the most part categorized American efforts as massive retaliation and mutually assured destruction blunt instruments to be casually dismissed in favor of more flexible approaches or summed up in inflammatory and judgmental terms like MAD These descriptors evolved into slogans and any nuanced discussion of the efficacy of the actual strategies withered due to a variety of political and social factors Drawing on newly released weapons effects information along with new information about Soviet capabilities as well as risky and covert espionage missions *Emergency War Plan* provides a completely new examination of American nuclear deterrence strategy during the first fifteen years of the Cold War the first such study since the 1980s Ultimately what emerges is a picture of a gargantuan and potentially devastating enterprise that was understood at the time by the public in only the vaguest terms but that was not as out of control as has been alleged and was more nuanced than previously understood **Encyclopedia of World War II** Alan Axelrod,2007 A reference to the ideological military political biographical and social topics surrounding World War II which is often considered the pivotal event of the twentieth century *Parliamentary Debates (Hansard)*.
