Machine Tools and Machinery as Capital Equipment United States Strategic Bombing Survey,1947 *Navy Air Pilot and Military Aeronautic Review* ,1918 *The Aeroplane* ,1927 **The Government Machine** Jon Agar,2003-09-26 An examination of technology and politics in the evolution of the British government machine In *The Government Machine* Jon Agar traces the mechanization of government work in the United Kingdom from the nineteenth to the early twenty first century He argues that this transformation has been tied to the rise of expert movements groups whose authority has rested on their expertise The deployment of machines was an attempt to gain control over state action a revolutionary move Agar shows how mechanization followed the popular depiction of government as machine like with British civil servants cast as components of a general purpose government machine indeed he argues that today s general purpose computer is the apotheosis of the civil servant Over the course of two centuries government has become the major repository and user of information the Civil Service itself can be seen as an information processing entity Agar argues that the changing capacities of government have depended on the implementation of new technologies and that the adoption of new technologies has depended on a vision of government and a fundamental model of organization Thus to study the history of technology is to study the state and vice versa **Aeronautics** ,1918 **Norman County, Minnesota, in the World War** ,1922 Consists primarily of photographs with brief biographies of Norman County residents active in foreign and domestic U S World War I efforts including soldiers Home Service workers Red Cross members Home Guard members and others
