Barriers to Recovery from 'Psychosis' Prateeksha Sharma, 2022-09-20 This book inaugurates the field of Mad Studies in the Indian subcontinent, investigating the barriers to recovery from the perspective of patients and caregivers. Offering a radical critique of the mental health system, it questions why the phenomenon of recovery from serious mental health issues is not more widespread. Drawing from narratives of patients, evidence from lived experiences around the globe, and literature on recovery in psychiatry, mental health legislations, and policies, it establishes the hitherto silenced voice of the patient as having testimonial viability via an emancipatory scholarship. It highlights the repeated marginalization of patients and the identity prejudice they experience in day-to-day situations as a form of epistemic violence. The book examines the barriers to recovery through an interdisciplinary investigation, scrutinizing relationships between individuals and institutions at interpersonal, intersocial, and global levels. The book will be of interest to researchers and scholars of psychiatry, psychology, anthropology, sociology, disability studies, Mad Studies, law, and policy, cultural studies, mental health, medicine, as well as general readers.

The Canons of Our Fathers Bentley Layton, 2014-09-18 This book is the first publication of a very early set of Christian monastic rules from Roman Egypt, accompanied by four preliminary chapters discussing their historical and social context and their character as rules. These rules were found quoted in the writings of the great Egyptian monastic leader Shenoute. Designed for a federation of monks and nuns who banded together about 360 CE, forming the so-called White Monastery Federation, the rules date back to the fourth and fifth centuries. New historical evidence is presented for the founding of the Federation, providing almost the earliest evidence for Christian communal cenobitic monasticism. The rules depict many intimate aspects of ascetic practice. Details of monastic daily life are mentioned in passing in the rules, and the author uses these details to describe their picture of monastic life under five general topics: the monastery as a physical plant, the human makeup of the community, ascetic observances, the hierarchy of authority, and the daily liturgy. The book includes a clear English translation of the rules, accompanied by the original Coptic text amounting to five hundred and ninety-five entries.
