Until the 1960s maths was studied as an academic subject in a desire to have more mathematicians The current trend however has moved away from viewing maths as a purely intellectual endeavour and towards developing a more mathematically competent workforce and citizenry This trend has seen a large increase in the number of maths schemes being produced by the major educational publishers which attempt to make maths easier and more approachable by using language instead of symbols So why do so many children still fail at maths The author contends that to understand this teachers need to analyze and evaluate the maths textbooks they are currently using The author shows the reader how to systematically analyze and evaluate these textbooks This interrogation of classroom resources should have important implications for teaching strategies and for textbook design and use [The Complete Directory of Large Print Books & Serials](#) ,1994 **Elementary and secondary education for science and engineering.** ,1988 *Subject Knowledge* Christopher J. Anstead,Ivor F Goodson,J. Marshall Mangan,2002-11-01

School knowledge has been a subject for historians notably in the field of history of education concentrating on the educational aspects of particular historical periods however links with contemporary education have often remained undeveloped This text attempts to account for the growth of increased interest by sociologists and others in school subjects since the 1960s Goodson s analysis of his own work in the UK and North America examines the range of insights afforded of the nature of schooling and teaching through the study of school subjects **Handbook of Writing Research** Charles A.
