Este volumen reúne un conjunto de importantes investigaciones para examinar el problema de la justicia y la igualdad de oportunidades desde la educación matemática, situándose más allá de los antiguos paradigmas y formas de ver la cuestión. La primera parte dedicada a problemas culturales más generales analiza propuestas de enseñanza de las matemáticas dirigidas a estudiantes de culturas necesidades e intereses diferentes. La segunda parte estudia las cuestiones de género en matemáticas desde diversas perspectivas incluida la feminista. La última parte se dedica al lenguaje y las matemáticas prestando una gran atención a las situaciones de bilingüismo y de minorías lingüísticas. A lo largo de todo el libro se plantean asimismo los problemas de la potenciación profesional de los docentes y de la recualificación e intensificación de su trabajo.

Aprendizaje de las matemáticas escolares desde un enfoque comunicacional Anna Sfard,2008-03-31 Los textos que conforman este libro surgen de dos preocupaciones profesionales muy persistentes una de ndole general y otra personal Como muchos de mis colegas no he estado satisfecha con la investigaci n existente sobre aprendizaje y como muchos otros decid remediar el problema tratando de revisar los anteojos conceptuales existentes El enfoque comunicacional presentado en este libro es producto de veinte a os de bqueda de la operacionalidad combinada con intentos de hallar una ruta segura entre dos necesidades conflictivas la necesidad de una comprensi n til por una parte y la necesidad de comunicabilidad y acumulabilidad por la otra Este marco especial hecho a la medida de las necesidades de investigaci n sobre el pensamiento matem tico y el aprendizaje se ofrece en este libro como una evidencia de que comprometerse con la segunda necesidad no es el precio necesario para satisfacer la primera Dicho esto la tarea de construir el marco no est cerca de completarse Por tanto recomiendo ver este volumen como un resumen provisional de los esfuerzos continuados m os y de mis colegas

**Diseño, implementación y evaluación de unidades didácticas de matemáticas en MAD 3** Gómez, Pedro, 2018-01-30 Este volumen presenta los informes finales de los siete grupos de la tercera promoción de la Maestría en Educación Matemática de la Facultad de Educación de la Universidad de los Andes. Cada grupo escogió un tema de las matemáticas escolares sobre el que realizó un ciclo de análisis didáctico a lo largo de los dos años del programa. Los temas escogidos fueron los siguientes: rotación en distancia entre dos puntos, función constante lineal y afin, espacios muestrales, estocásticos, probabilidad condicional, función exponencial creciente y principio de multiplicación. En los capítulos de este libro se presentan ejemplos del análisis didáctico en la práctica. Presentan de manera detallada un ciclo completo del procedimiento. Son el fruto de un trabajo sistemático en el que los grupos analizaron en profundidad su tema, se basaron en esa información para fundamentar diseño y justificar su unidad didáctica y recogieron y analizaron la información que surgió de la implementación para evaluarla y mejorarla. Estos resultados son una muestra del trabajo que realizan grupos de profesores en formación como investigación sistemática sobre su propia práctica y la hacen pública.
