Equidad y enseñanza de las matemáticas, 1997-12-02. La cuestión de cómo proporcionar una escolarización equitativa a las mujeres y a las minorías lingüísticas ha vuelto al centro de la investigación política educativa y los debates con ella relacionados. Este volumen reúne un conjunto de importantes investigaciones para examinar el problema de la justicia y la igualdad de oportunidades desde la educación matemática situándose más allá de los antiguos paradigmas y formas de ver la cuestión. La primera parte, dedicada a problemas culturales más generales, analiza propuestas de enseñanza de las matemáticas dirigidas a estudiantes de culturas, necesidades e intereses diferentes. La segunda parte estudia las cuestiones de género en matemáticas desde diversas perspectivas, incluida la feminista. La última parte se dedica al lenguaje y las matemáticas prestando una gran atención a las situaciones de bilingüismo y de minorías lingüísticas. A lo largo de todo el libro se plantean, asimismo, los problemas de la potenciación profesional de los docentes y de la recualificación e intensificación de su trabajo.

sobre la forma como usan las Teorías Matemáticas para tecer a su propia visión del mundo **Aprendizaje de las matemáticas escolares desde un enfoque comunicacional** Anna Sfard, 2008-03-31 Los textos que conforman este libro surgen de dos preocupaciones profesionales muy persistentes una de índole general y otra personal Como muchos de mis colegas no he estado satisfecha con la investigación existente sobre aprendizaje y como muchos otros decidí remediar el problema tratando de revisar los anteojos conceptuales existentes El enfoque comunicacional presentado en este libro es producto de veinte años de búsqueda de la operacionalidad combinada con intentos de hallar una ruta segura entre dos necesidades conflictivas la necesidad de una comprensión por una parte y la necesidad de comunicabilidad y acumulabilidad por la otra Este marco especial hecho a la medida de las necesidades de investigación sobre el pensamiento matemático y el aprendizaje se ofrece en este libro como una evidencia de que comprometerse con la segunda necesidad no es el precio necesario para satisfacer la primera Dicho esto la tarea de construir el marco no está cerca de completarse Por tanto recomiendo ver este volumen como un resumen provisional de los esfuerzos continuados míos y de mis colegas

matemáticas Tina Thoburn, Jack E. Forbes, Robert D. Bechtel, 1985 Diseño, implementación y evaluación de unidades didácticas de matemáticas en MAD 3 Gómez, Pedro, 2018-01-30 Este volumen presenta los informes finales de los siete grupos de la tercera promoción de la Maestría en Educación Matemática de la Facultad de Educación de la Universidad de los Andes. Cada grupo escogió un tema de las matemáticas escolares sobre el que realizó un ciclo de análisis didáctico a lo largo de los dos años del programa. Los temas escogidos fueron los siguientes: rotación, distancia entre dos puntos, función constante lineal y afín, espacios muestrales, estocásticos, probabilidad condicional, función exponencial creciente y principio de multiplicación. En los capítulos de este libro se presentan ejemplos del análisis didáctico en la práctica. Presentan de manera detallada un ciclo completo del procedimiento. Son el fruto de un trabajo sistemático en el que los grupos analizaron en profundidad su tema; se basaron en esa información para fundamentar, diseñar y justificar su unidad didáctica y recogieron y analizaron la información que surgió de la implementación para evaluarla y mejorarla. Estos resultados son una muestra del trabajo que realizan grupos de profesores en formación como indagación sistemática sobre su propia práctica y la hacen pública.

En este encuentro se han alternado sesiones comunes y de los grupos de trabajo. Las sesiones comunes han consistido en seminarios, presentación de proyectos de investigación, presentación de paneles y una mesa redonda. En los seminarios se mostraron diferentes perspectivas de aproximación a un tema común de investigación y la presentación de los proyectos de investigación va seguida de la reacción de un investigador ajeno a ambos proyectos.

Matemática emocional Inés Ma Gómez Chacón, 2023-05-15 La experiencia que se describe en este libro nace de la reflexión desarrollada por la autora en torno a la búsqueda de propuestas alternativas para estudiantes que fracasan en la matemática escolar. El trabajo que aquí se ofrece representa un logro tanto en la integración de la perspectiva afectiva y cognitiva en las situaciones de enseñanza y aprendizaje como en el planteamiento que se propone de formación del profesorado. Este libro contiene una propuesta práctica til a cualquier persona que quiera examinar la interacción entre razón y emoción en sí misma y en otros. Se ofrecen además estrategias apropiadas para trabajar los procesos mentales involucrados en las emociones y algunos elementos curriculares para llevar a cabo un programa de intervención en las instituciones.
