Economics for Development: Empirical Approaches to Selected Social and Economic Issues in Transition

Economies Mahmut Zortuk, 2018-01-15 Transition economies experience transformation of their economic system Following the disintegration of the Soviet Union a number of former socialist countries underwent transitions from central planning to a market economy More generally many rapidly growing economies undergo no less profound transformations of their economic systems Contrary to common misconception the transition process cannot be simply reduced to eliminating state intervention and liberalizing the economy Economies under transition exhibit a unique set of policy challenges Unlike developed market economies missing markets or market failures abound Economic transformation takes the form of rapidly

evolving patterns of international trade and investment industrial structure and consumption These changes call for appropriate public policies A continuing flow of investment hinges on suitable institutions the provision of public infrastructure and other public goods Adequate regulation can be central in ensuring that environmental resources are sustainably managed And sophisticated production systems call for corresponding social institutions in terms of education health and welfare provisions In all these cases accurate empirical assessments are central to the design of effective policy This book presents a selection of pressing economic and social issues in transition economies Selected issues include the development of particular industrial sectors the drivers and consequences of foreign direct investment public finances urbanization social indicators environmental policy and energy diversification In each case an original empirical analysis is performed using a variety of advanced quantitative methods applied to recent data The book will be of interest to economists studying transition economies economic development or having a general interest in applied economics It will be of particular interest to applied economists policy analysts and policy makers in transition economies concerned with the shape and direction of appropriate economic reforms

Macroeconomics Alex M. Thomas, 2021-09-30 Macroeconomics An Introduction provides a lucid and novel introduction to macroeconomic issues It introduces the reader to an alternative approach of understanding macroeconomics which is inspired by the works of Adam Smith David Ricardo Karl Marx John Maynard Keynes and Piero Sraffa It also presents the reader with a critical account of mainstream marginalist macroeconomics The book begins with a brief history of economic theories and then takes the reader through three different ways of conceptualizing the macroeconomy Subsequently the theories of money and interest rates output and employment levels and economic growth are discussed The book ends by providing a policy template for addressing the macroeconomic concerns of unemployment and inflation The conceptual discussion in Macroeconomics is situated within the context of the Indian economy Besides using publicly available data the contextual description is instantiated using excerpts from works of fiction by Indian authors

New Approaches to Economic Challenges Beyond Growth Towards a New Economic Approach OECD, 2020-09-11 As the world's leading intergovernmental forum on economic policy the OECD has a central role to play in creating a new economic narrative OECD Secretary General Angel Gurr a therefore invited a high level group of experts to contribute their proposals on what needs to change in economic policy and policymaking This report summarises their conclusions

Microeconomic Issues Today Robert Barry Carson, Wade L. Thomas, Jason Hecht, 1999 Completely revised and updated this new edition covers seven current microeconomic issues including the environment agriculture consumer welfare competition deregulation income distribution with a new chapter on fair taxation

Dynamic Approaches to Global Economic Challenges Birgit Bednar-Friedl, Jörn Kleinert, 2015-09-30 This book addresses three big economic challenges from a dynamic perspective European integration economic growth and global climate change In the light of the recent crises of the European Union EU the first part of the book deals with challenges to the real monetary and

fiscal integration of the EU and required institutional adjustments The second part of the book addresses fundamental challenges of advanced market economies like economic growth and changes of technologies The final part focuses on the global challenge of climate change from an economic perspective and discusses policy strategies for a successful mitigation of climate change

Macroeconomics After the Financial Crisis Mogens Ove Madsen, Finn Olesen, 2016-04-14 How should Europe cope with the negative and still unfolding economic consequences of the current economic crisis And why does Europe seem to be more conservative than the USA in dealing with the crisis Since the outbreak of the current international economic crisis in 2008 the USA and many of the European countries have been tormented by high levels of unemployment and low levels of inflation interest rates close to zero and fiscal policies of austerity As such the modern economic mainstream has been challenged by these empirical facts Today several years after the outbreak of the international economic crisis supply side effects do not seem to be increasing employment as the modern mainstream claimed they would Aggregate demand has to play a more important role in macroeconomic analysis than hitherto That is there is a need for alternative explanations of how a modern macro economy is expected to function and how the macroeconomic outcome could be manipulated by the right economic policy proposals As expressed by the contents of the present book a Post Keynesian understanding proposes such an alternative theoretically methodologically and in terms of policy measures This book will present new materials and approaches especially new evidence and new views on the potential problems of public debt the European Union and the present crisis Central Banking hysteresis in an agent based framework the foundations of macroeconomics and the problems of uncertainty

Theory and Methods of Economic Evaluation of Health Care Magnus Johannesson, 1996-05-31 Most economic evaluations of health care programmes at the moment are cost effectiveness and cost utility analyses The problem with these methods is that their theoretical foundations are unclear This has led to confusion about how to define the costs and health effects and how to interpret the results of these studies In the environmental and traffic safety fields it is instead common to carry out traditional cost bene fit analyses of health improving programmes This striking difference in how health programmes are assessed in different fields was the original motivation for writing this book The aim of the book is to try and provide a coherent framework within cost bene fit analysis and welfare economics for the different methods of economic evaluation in the health care field The book is written in an easily accessible manner and several examples of applications of the different methods are provided It is my hope that it will be useful both for teaching purposes and as a guide for practitioners in the field Glenn C Blomquist John D Graham Rich O Connor and four anonymous referees provided helpful comments on previous versions of the manuscript I would also like to express my gratitude to the following persons for helping me to prepare the manuscript Carl Magnus Berglund Carin Blanksvard Ann Brown and Ziad Obeid
