Part one considers the Phillips Curve, wage rates, and profits. The second part discusses the various theories of the causes of inflation and explores issues such as the depreciation of money, monetarism, and cost push versus demand pull inflation. Part three looks at anti inflation policies focusing on incomes policies, credit and monetary policy, and wage price controls among other issues. Keynesian macroeconomics is evaluated in the fourth section as well as inflation and the national income model. The final part considers supply side economics.
