Macroeconomics and New Macroeconomics Bernhard Felderer, Stefan Homburg, 1992-08-21. This book gives a comprehensive account of traditional and more recent developments in macroeconomic theory. It is written primarily for students at the intermediate level. The book differs from the customary expositions in that the authors do not discuss topics by topic but orthodoxy by orthodoxy. Thus the main approaches like Classical theory, Keynesian theory, theory of portfolio selection, Monetarism, Rational Expectations theory and Neoknesian disequilibrium theory are presented in historical order. Each of these approaches is substantiated and criticized in a self-contained chapter and the authors have taken great pains to bring out the relations and differences between them. A mathematical appendix reviews those mathematical facts which are especially important for macroeconomic models and serves to make the text easy to read.

Lectures in Macroeconomics Kazimierz Łaski, 2019-07-04. Lectures in Macroeconomics: A Capitalist Economy Without Unemployment provides a systematic account of the principle of aggregate demand based on the work of Polish economist Michał Kalecki, best known as one of the originators of the Keynesian Revolution in macroeconomics. The lectures demonstrate the importance of aggregate demand in determining total output and employment in the capitalist economy. They show how the investment decisions of firms affect economic growth, arguing that due to the unstable nature of investment it is important that the government has a central role in stabilizing the economy. This English translation of Kazimierz Łaski's final work brings up to date fundamental concepts to give a picture of the twenty-first capitalist economy and the obstacles that must be overcome in bringing it to full employment. It introduces the role of money and finance in the contemporary capitalist economy as well as the central role of the labour market and wages. The analysis is illustrated with statistics and discussion around the evolution of capitalist economies and the rise of economic inequality since the Second World War, culminating in the 2008 crisis and the economic deflation affecting Europe since that crisis. Lectures in Macroeconomics remarks critically upon the neo-classical approach to economics that has brought about slow economic growth, unemployment and inequality.
